

Keep our profit, pay everyone fairly, and get ready to grow

Our goal: keep a net margin of at least 15% and pay everyone fairly, at the same time. Then we are ready for investors, and we can grow into new business units.

Our answer: keep the new prices, sell more EAP (monthly counseling contracts for companies), and hire only when signed work pays for the person.

1 Price

2 People

3 Growth

Based on our 2027 financial model (version 13). All money is in Rupiah million (Rp M) unless stated.

Our goal has two parts, and we must reach both at the same time

Our goal

Part 1: a net margin of at least 15%

What it means: from every Rp100 a client pays us, Rp15 stays with us after we pay all costs, all salaries and tax.

Why we need it:

Safety. Some months have no big events. Profit from good months pays salaries in quiet months (slide 3).

Money to grow. Profit pays for new staff, Instagram and new units, without loans.

Trust. Large training firms keep about 5%. We are small: one lost client hurts us more, so we need a bigger cushion.

Part 2: fair pay for everyone

What it means: full-time staff earn at least the Jakarta minimum wage (Rp5.73M a month), plus BPJS (health and work insurance) and THR (holiday bonus). Part-time pay is already fair.

Why we need it:

The law. The minimum wage is the legal floor for employees.

Good people stay. A new person needs time to learn, and clients notice.

Better care. Tired, underpaid staff give weaker support to clients.

Investors check it. Profit that depends on low pay is not real profit.

What both parts give us

Ready for investors: we can show a profit that is real and fair.

Ready to grow: the same team, system and cash can start new business units, for example the Theta app and Coreitera assessments (slide 18).

Our test: fair pay is a must, because it is the law. Every other idea must keep the year's margin at 15% or more. If it does not, we wait.

Why 15%: we lose money in 4 of 12 months, so the good months must carry the whole year

Our goal

Net profit each month in 2027 (Rp M)

What this chart shows

Red = a month with a loss. Salaries and office costs come every month. Big programs do not.

The worst months lose about Rp35M. January and February have almost no events.

Good months must pay for bad ones. A 15% margin on Rp1,847M of sales gives Rp277M a year to cover quiet months and to grow.

Without the cushion, one lost program in a good month can turn the whole year into a loss.

Our answer: keep the new prices, pay our team fairly, and sell more EAP before we hire more people

Our answer

In a normal full year, the new prices give 25%, but only because our full-time staff earn less than the minimum wage. Fair pay drops it to 4%; two more EAP contracts bring it back to 16%. In 2027 itself, new work starts in March and founder pay in May: margin 22.8%, lowest cash Rp108M in Apr 2027.

1 Price: what we charge

Big programs for a regulator's head office: about Rp100M.

The same program for each branch: Rp28.5M to Rp61M a day.

EAP: a monthly fee for each employee.

Every price is at least 3 times our cost.

2 People: who we pay

Pay 4 full-time staff fairly: Rp26M more a month, with Instagram ads.

Hire only when new signed work pays for the person.

Better contracts for psychologists, trainers and the project manager.

3 Growth: new sales

EAP brings income every month: from 12% to 29% of sales.

Find a co-founder for sales first.

Instagram builds trust; Theta vouchers bring new clients.

EAP (Employee Assistance Program): a company pays us every month, and we give its staff counseling and wellbeing support.

The new prices fix our profit only because our team is underpaid, and a second price rise cannot fix it

The problem

Net margin in a normal full year (blue = 15% or more)

How to read the bars

New prices: 25%, but staff still earn below the minimum wage.

+ fair pay: 4%. Fair pay and Instagram ads cost Rp313M a year.

+ 2 EAP: 16%. Each EAP contract adds Rp120M of gross profit a year.

+ co-founder and bank deal: 23%.

Why not raise prices again?

Without new EAP, every event price would need +16%: the 3-day program at about Rp116M, the 1-day regional program at about Rp33M. Regulators have budget limits, and clients may leave.

Fair pay adds Rp26M a month to our fixed costs, and we pay it even in quiet months

The problem

Fixed cost per month (Rp M)

What changes

Fixed cost = what we pay every month, even with no events: salaries, office, software.

Total: Rp52.7M to Rp78.8M a month. Staff pay rises the most, shown in red.

Founders stay at Rp25M. We do not raise founder pay in this plan.

Why it matters: each month we must earn at least Rp79M of gross profit before we keep any profit. Gross profit = money left after we pay the people who deliver the work.

Real timing: we pitch and sign from October to February, and new work starts in March

The problem

How to read it

Grey bar taller than blue: we spend more than we sell that month.

Oct to Feb: only EAP and counseling bring money. Cash falls from Rp210M to Rp108M.

Mar to Jun: new programs start, but clients pay 0 to 60 days later, so cash stays low.

Jul to Dec: one tight month in July (costs of a busy month come first), then cash grows to Rp446M.

Use it every month: put real sales and costs next to these bars. If the dark line moves toward the red line, act early.

Source: Model version 14, Outlook sheet, recalculated in Excel: no new sales before March 2027, growth plan on, founders paid from May 2027.

Start founder salaries in May 2027: if they start in January, cash almost runs out in April

The problem

Founder salaries start in: May 2027. The founders still get 8 months of pay in 2027 (Rp200M). July is safer (no month below the floor) but pays 2 months less. If March sales are late, move founder pay to July. Months not paid can be paid later as a bonus.

Source: Model version 14, recalculated in Excel for each start month. Same plan, only the founder salary start changes.

Set prices along the client journey: start at the head office, spread to branches, keep the client with EAP

1 Price

1. START

Regulator head office (BI, OJK, LPS)

3-day trainer program: Rp100M
(Rp94M training + Rp6M assessment)

Price close to the client's budget limit
(the most they are allowed to pay)

Do not raise the price of an old item.
Add a new item, such as an
assessment. A new item gets its own
budget.

Contract: one yearly agreement with
the head office

2. SPREAD

Their branches (BI regional offices, bank
branches)

1-day regional program: Rp28.5M

State bank Rp51M, private bank
Rp61M, per group per day

Discount: 5% for 5 or more groups,
10% for 10 or more. Never more.

Contract: yearly agreement + a work
order (SPK) for each office

3. KEEP

EAP: support for the client's staff

Today: Rp15M per contract per month

New: Rp30k per employee per month,
at least 500 staff (= Rp15M)

Plus Theta app: Rp5k per employee
(paid to Theta)

Contract: 12 months, renews by itself,
paid monthly in advance

Our prices sit between the government fee guide and big training firms, and most pass our 3 times rule

1 Price

Grey = outside prices. Blue = ours. Red = below our rule. Raise public events to Rp24M. Keep the counseling price: it brings new clients and is only 1.5% of sales.

Each hire comes with the work that pays for it, so the margin is back above 15% after step 1

2 People

Net margin after each hiring step

Two red bars, two lessons

Step 1 (11%): fair pay starts in January, before new EAP. It cannot wait, because it is the law. EAP contract 2 in April brings us back.

Last bar (14%): if Teman Journey paid the CTO, the full team would fall below 15%. So Theta's own income pays the CTO.

The rule: no signed work, no hire.

Our real limit is people: the project manager is over capacity in 8 of 15 months, trainers in 10

2 People

Red = more work than our people can do. Fix: a second project manager on standby (paid per project) and train trainers up to 8. Plan for 11 is too many.

Treat each type of worker differently, and protect the people who are hard to replace

2 People

How hard to replace them

Hard to replace, smaller effect

Project manager: only 1 person, 1 to 2 projects a month (slide 12)

Trainers: 2 certified today, up to 7 needed in a busy month

What to do: secure them

Hard to replace, big effect

Full-time psychologist

Lead trainers that regulators trust

What to do: long-term partnership, fair pay, a career path

Easy to replace, smaller effect

Event helpers, design, interns

Venue and travel (the client pays)

What to do: keep it simple, pay per day

Easy to replace, big effect

Part-time psychologists for EAP and counseling

Many licensed psychologists in Jakarta

What to do: build a group and pay per session

How much they affect our results and our clients' trust

What this means

This is the Kraljic matrix, a tool buyers use to sort suppliers. Here, the suppliers are our people.

Do not cut pay. The right price is not the lowest price.

Saving is not the goal. Delivery is 32% of sales, so saving 10% gives only about Rp48M a year.

Keeping people is the goal. One project manager and two trainers limit how many events we can sell.

Pay part-timers per piece of work, so quiet months do not burn cash.

Improve every contract in four areas: pay, time promised, quality checks and risk

2 People

Area	Psychologists (full-time and part-time)	Trainers	Project manager
1. How we pay	Full-time: market salary + bonus when an EAP client renews. Part-time: fee per session, higher for senior licence	Day rate by level, extra for the 3-day program; client pays travel; trainer repays training cost if they leave before 4 events	Small monthly fee to stay available + fee per project (bigger project, bigger fee)
2. What they promise	Part-time: at least 8 hours a month on Theta; reply within 24 hours; 3 months notice before leaving	Yearly agreement; at most 2 events a month; confirm 30 days before; we get the first call	Up to 2 projects a month; we get the first call; a handover file for each project
3. How we check quality	Client rating 4.5 of 5 or higher; few missed sessions; reports on time; review every 3 months	Participant scores; test results before and after the training	On time; invoice sent before BI's payment date; client rating; on budget
4. How we reduce risk	Keep client data private (data protection law); senior supervision; insurance; no direct work with our clients for 12 months	Teman Journey owns the training material; trainers use it only for us; a backup trainer for each event	A written step-by-step guide; a second project manager joins one project every 3 months to learn

Why psychologists will join us: a minimum number of paid hours, supervision and SKP points (professional credits), work with BI and OJK, and flexible hours on Theta.

Growth also makes us safer: BI falls from 61% to 38% of our sales

Sales for one year by type of client (Rp M)

Why this matters

- One big client is a risk. Today BI gives 61% of our sales. If BI cuts its budget, we feel it at once.
- With growth, BI is 38%. Our target is below 40%.
- Monthly income rises from 12% to 23%. EAP money comes every month, also in quiet months.
- Investors like both: many clients, and income that repeats.

Source: Our 2027 financial model (version 13) and analysis/growth_scenarios.py. 'With growth' = one full year with 2 more EAP contracts and 10 bank training days.

Grow in one loop: win the head office, spread to its branches, and keep the client with EAP

3 Growth

New clients and their stories go back to Instagram, and the loop starts again.

Instagram targets

Reach that grows every month
Messages that turn into counseling bookings
1 client story every 3 months
Cost: about Rp18M a month for marketing staff and ads
Set exact numbers after 1 month of data

How we deliver EAP

Our full-time psychologist manages each client
Part-time psychologists run sessions, paid per hour
A report for the client every 3 months
First check: is our current EAP contract still active?

Theta vouchers: free new clients

Each EAP client's staff get Theta vouchers
Staff who like the service book more sessions on their own
We pay nothing to find these clients
Track: how many vouchers turn into paid sessions

Choose a sales co-founder first: 3 bank training days pay their cost, 10 days pay it more than 3 times

3 Growth

Question	Sales co-founder	Marketing co-founder
Does it fix our biggest limit?	Yes: the founders do all sales, and one founder studies in Singapore	No: marketing does not close regulator deals
How do our clients buy?	Regulators and banks buy through relationships and trust	Ads help the public side (counseling) most
Can we hire it as staff instead?	Hard: good sellers to regulators are rare	Yes: marketing staff + ads cost about Rp18M a month
Our choice	First	Later, or hire as staff

Co-founder = a partner who owns part of the company. Shares are earned over time, so a partner who leaves early does not keep them.

The deal

Salary about Rp8M a month + shares earned over 4 years (nothing if they leave in year 1).
Year-1 goals: 1 bank agreement, first OJK or LPS program, 2 EAP renewals.

We are ready to invest in new business units once our cash passes 6 months of fixed costs

3 Growth

Our rule for growth money

1. Keep a cushion. 6 months of fixed cost, about Rp521M, stays in the bank for bad times.

2. Invest above it. Up to half of each year's net profit can go to new business units, such as the Theta app and Coreitera.

When: in early 2028. Cash is Rp446M at the end of 2027.

How much: a normal full year with this plan makes about Rp540M net profit, so about Rp270M a year for new units.

Pitch and sign now, deliver from March, and take three decisions this month

Next steps

Oct 2026 to Feb 2027

Pitch and sign

Pitch BI 2027 programs before budgets close, at the new prices
Pitch EAP to 2 banks, LPS and OJK; sign for delivery from March
Fair pay for 3 full-time staff from January

Mar to Jun 2027

Deliver

First new programs in March
EAP 2 starts in April; hire the full-time psychologist
Founder salaries start in May

Jul to Sep 2027

Grow

EAP 3 starts; sales co-founder joins
Build a group of 4 to 6 part-time psychologists
Train trainers up to 8, not 11

Oct to Dec 2027

Scale

First bank agreement: 1 training day a month
Busy season: second project manager on standby
Theta pays 75% of the CTO salary

Three decisions for the founders

1. Pitch now. Goal by February: BI 2027 programs, 2 EAP contracts and 1 bank deal signed.
2. Fair pay from January (Rp17.8M a month). Founder salaries from May; July if March sales are late.
3. Start the co-founder search. Theta, not Teman Journey, pays the CTO.

Year 2027 with this plan

Net margin 22.8%, with fair pay

Sales Rp1,847M, net profit Rp422M. Lowest cash Rp108M (Apr 2027), Rp446M at the end of 2027.

Risks: no bank deal gives 18.7%. BI buying 30% less gives 15.5% and cash as low as Rp63M.

The numbers behind the charts

Appendix

Top: a normal full year, each row adds one change. Bottom: 2027 month by month; there the project manager cost starts later (slide 25).

A normal full year (2027 sales plan)	Sales	Gross profit	Fixed cost	Net profit	Net margin
Old prices, today's pay	1,208			152	12.5%
New prices, today's pay	1,502	1,018	632	378	25.2%
+ fair pay, psychologist, Instagram ads	1,502	1,018	945	65	4.3%
+ 2 more EAP contracts	1,862	1,258	945	303	16.3%
+ co-founder, but no new deal	1,862	1,258	1,041	207	11.1%
+ co-founder wins 10 bank training days	2,372	1,593	1,041	540	22.8%
+ Teman Journey pays the CTO	2,372	1,593	1,161	420	17.7%
+ second admin	2,372	1,593	1,243	339	14.3%
Full team, Theta pays the CTO	2,372	1,593	1,123	459	19.3%

Year 2027 (model version 14)	Sales	Net profit	Net margin	Lowest cash	Cash end 2027	Months below floor
Old timing (sales from Oct 2026), today's pay	1,502	378	25.2%	204 (Oct 26)	733	0
Real timing (new work from Mar 2027), today's pay	1,462	402	27.5%	92 (Apr 27)	515	0
Real timing + growth plan, founders paid from Jan	1,847	322	17.4%	8 (Apr 27)	346	10
Same, founders paid from May (our plan)	1,847	422	22.8%	108 (Apr 27)	446	1
Our plan, but no bank deal	1,686	315	18.7%	108 (Apr 27)	397	1
Our plan, but BI buys 30% less	1,573	244	15.5%	63 (Jul 27)	278	6

Source: Our 2027 financial model (version 13) and analysis/growth_scenarios.py; model version 14 recalculated in Excel. Tax is 0.5% of sales.

Hire in a fixed order, only when signed work pays for the person

Appendix

Trigger = the event that tells us it is time to hire. No trigger, no hire.

Step	Role	Extra cost a month	Trigger: hire when...	What pays for it	Net margin after
1	Fair pay for admin, social media and marketing lead, plus Instagram ads	+Rp17.8M	January 2027, when the new prices start	The new prices	11% (before more EAP)
2	Full-time psychologist (replaces the part-time PIC)	+Rp8.3M	The second EAP contract is signed	Less than 1 EAP contract	16% with 2 more EAP
3	Sales co-founder (salary + shares)	+Rp8M	2 EAP contracts running and a bank, OJK or LPS offer is open	3 bank training days a year	23% with 10 bank days
4	CTO for the Theta app	+Rp10M	Theta's own income covers the salary	4 EAP contracts with Theta	Theta pays, not Teman Journey
5	Second project manager (paid per project)	Per project	More than 2 projects a month, 2 months in a row	The fee of each project	No change
6	Second admin	+Rp6.8M	Over 12 invoices or 6 business events a month, for 3 months	Until then, a daily freelancer	19% with the full team

PIC = person in charge. Today a part-time psychologist leads our clinical work; step 2 makes this a full-time role.

Fair pay: what each full-time role costs at market pay

Appendix

Role	Pay today (Rp M a month)	Fair pay	Fair pay + BPJS and THR	Increase	Based on
Admin	3.0	5.7	6.8	+3.8	Jakarta minimum wage
Social media staff	1.5	5.7	6.8	+5.3	Jakarta minimum wage
Marketing lead	2.5	7.0	8.3	+5.8	Minimum wage + 22% for a lead role
Full-time psychologist (was part-time)	2.3	9.0	10.6	+8.3	Psychologist market pay (low end)
2 interns (marketing, operations)	2.0	2.0	2.0	+0.0	Intern allowance, no change
More Instagram ads and content			3.0	+3.0	Founders' budget choice
Total	11.3		37.4	+26.1	

In short: fixed costs rise from Rp52.7M to Rp78.8M a month (founders included). To keep 15% profit, we need about Rp1,801M of sales a year. Our plan has Rp1,502M. EAP and the bank deal must close this gap.

Word list: the business words in this deck, in simple terms

Appendix

Word	What it means
Sales (revenue)	All the money clients pay us
Delivery cost	What one job costs us: psychologist and trainer fees, materials
Gross profit	Sales minus delivery cost. One EAP contract: 15 - 5 = Rp10M a month
Fixed cost	What we pay every month, even with no work: salaries, office, software
Net profit	Gross profit minus fixed cost and tax: what we really keep
Net margin	Net profit as a share of sales. 15% = we keep Rp15 of every Rp100
Break-even	The point where income covers a cost exactly; after it, we make profit
Cash	Money in the bank today. Profit is not cash until the client pays
Cash cushion	Money we keep for bad times: 6 months of fixed cost

Word	What it means
Fair pay	At least the minimum wage, plus BPJS and THR, for full-time staff
UMP, BPJS, THR	Minimum wage; state health and work insurance; holiday bonus
EAP	A company pays us monthly; we support its staff with counseling
Recurring income	Money that comes every month without a new sale, like EAP
Trigger	The event that tells us it is time to hire
Co-founder, shares	A partner who owns part of the company; shares are earned over years
Business unit	A separate part of the business, for example Theta or Coreitera
Framework, SPK	A yearly agreement with a client; a work order for one job under it
Client share	How much of our sales comes from one client, such as BI

Risks in our people supply, and how we respond

Appendix

Ways to respond: reduce the risk, share it (for example with insurance), accept it, or stop the activity.

Risk	Chance	Impact	Response	Action	Who watches, and when to act
One project manager has too much work	High	High	Reduce	Second project manager on standby; written guide (slide 12)	Operations lead; 3 or more projects in a month
A certified trainer leaves	Medium	High	Reduce	Yearly agreement; trainer repays training cost; train up to 8	Galih; fewer trainers than the busiest month needs + 1
A client hires our trainer directly	Medium	Medium	Reduce	No direct work with our clients for 12 months; we own the material	Co-founder; any direct approach
A clinical or ethics problem	Low	High	Share + reduce	Insurance; senior supervision; clear steps to escalate	Full-time psychologist; any case
Staff data leaks (EAP, Theta)	Low	High	Reduce	Consent, access control, data agreement (data protection law)	CTO; check every 3 months
BI cuts its budget	Medium	High	Reduce	Grow EAP and banks: BI share of sales from 61% to 38%	Founders; BI below plan for 2 months

Bad-year check: in the model's worst case (no new business January to June, BI buys 30% less), margin is 8% with today's pay. Do not start hiring step 3 or later while this risk is real.

What v14 fixed, what is still open, and the estimates to check

Appendix

What model version 14 fixed

Real timing: no new sales before March 2027 (switch in Inputs)

Fair pay, new EAP, co-founder and bank days are inside the model

New Outlook sheet: sales, costs and cash in one chart

Still open

Project manager is a fixed salary in the model; she is paid per project

Theta and CTO costs are in no model

Is our current EAP contract active, and for how many staff?

Will BI accept the new 2027 prices?

Tax: does the 0.5% small-business tax still apply as sales grow?

Estimate	Value we used	How to check
BPJS and THR on top of salary	18% of salary	Payroll provider quote
Full-time psychologist salary	Rp9M a month	3 job ads or offers
EAP price per employee	Rp30k a month, 500 staff	Ask 2 bank HR heads
Theta access per employee	Rp5k a month	Same 2 bank HR heads
Sales co-founder salary	Rp8M a month + shares	Talks with candidates
CTO salary	Rp10M a month	CTO's expectation
Bank deal	1 training day a month from Oct 2027	First bank proposal
Bank payment timing	20% / 50% / 30% over 60 days	First bank contract
New work starts	March 2027	Signed contracts by February
Income tax	0.5% of sales	Tax consultant
