TEMAN JOURNEY · GROWTH PLAN · 5 OCT 2026

Create real value for our clients, in a business that pays for itself

Two goals, tracked through four impact pillars: clients, people, company and community. Fair pay and a 15%+ margin are how we show it works.

26.1%
net margin in 2027 (current estimate)

Rp82M
lowest cash, Feb 2027: our weak point

March 2027
new work starts; we pitch and sign now

Three estimates in this deck: conservative, current and aggressive. All money is in Rupiah million (Rp M).

Value for clients pays for fair pay and 26.1% margin

OUR ANSWER

Goals and pillars: slide 4. Money in (A. B2B, B. B2C), money out (C. people), timing (D. cash).

A B2B is our engine

88%

of 2027 sales

- Win the head office, spread to its branches, keep the client with EAP
- Send BI one full-year 2027 proposal by 17 October
- EAP and banks cut BI's share from 61% to 38%

B B2C pays for our clinic

12%

of 2027 sales

- Counseling pays our 2 part-time psychologists from Apr 2027
- Referral wins a client at a quarter of the ad cost
- Full-time psychologist only when B2C can pay for it (2028)

C People follow the work

Rp88M

running cost a month by Oct 2027, up in steps from Rp32M

- No signed work, no hire
- Pay rises unlock with sales targets, not dates
- The limit moves: founders now, project manager from July

D Cash is protected

Rp82M

lowest cash (Feb 2027)

- Sell 4 to 6 months before the work
- Guard rule + 30% down payment from BI
- Bad year (conservative): still 16.6% margin

The two problems, and where we solve them: profit that depends on low pay (slide 6) is solved in A, B and C: more B2B and B2C sales pay for fair pay, released in steps. The cash gap in the pitch months (slide 7) is solved in A and D: sell early, get paid earlier, guard the cash.

Source: Our model, current estimate for 2027, month by month. Current estimate; conservative and aggressive estimates on slide 27.

WHY WE ACT

What do we want, and what stops us?

Our answer: Real value for clients, in a business that pays for itself. Today profit relies on low pay, and cash runs thin before March.

2 + 4
goals + impact pillars

15%+
net margin we need

Questions this part answers

- What are our goals, and how do we measure them?
- Why 15%?
- Why do we lose money in some months?
- Why are the new prices not enough?
- Why is cash tight?

A B2B | **B** B2C | **C** People | **D** Money

Two goals, four impact pillars

OUR GOAL

The goals say why we exist. The pillars show, with numbers, that it is working.

1 Create real value for our clients
The people we train and counsel change what they know and do, and clients can see it.

2 Build a business that pays for itself
A 15%+ margin and safe cash, without outside money, so we can keep doing goal 1.

WE KNOW IT IS WORKING WHEN THESE NUMBERS MOVE

1 Clients
BI, banks, EAP clients

1 → 3
EAP contracts active, by Jul 2027; then we track renewals (slide 10)

Before / after
scores on every training, from Q4 2026

1.4
sessions per B2C client from Q3 2027: our plan (slide 18)

2 People
Staff and psychologists

Rp5.73M
fair-pay floor + BPJS and THR (slide 22)

Rp100/150/200M
monthly sales that unlock the 3 pay steps

74%
busiest load on paid part-timers (healthy 60-80%) (slide 39)

3 Company
Founders and future investors

26.1%
net margin in 2027; we need 15%+ (slide 27)

Rp82M
lowest cash (Feb 2027) (slide 28)

61% → 38%
BI's share of sales, new prices only → full plan (slide 14)

4 Community
People beyond our clients

710 + ~1,400
people we train in 2027 + people they reach (estimate: 2 each)

480 + 166
people at our bank and public events + counseling sessions (slide 18)

20%
new clients from referral by Q4 2027 (slide 19)

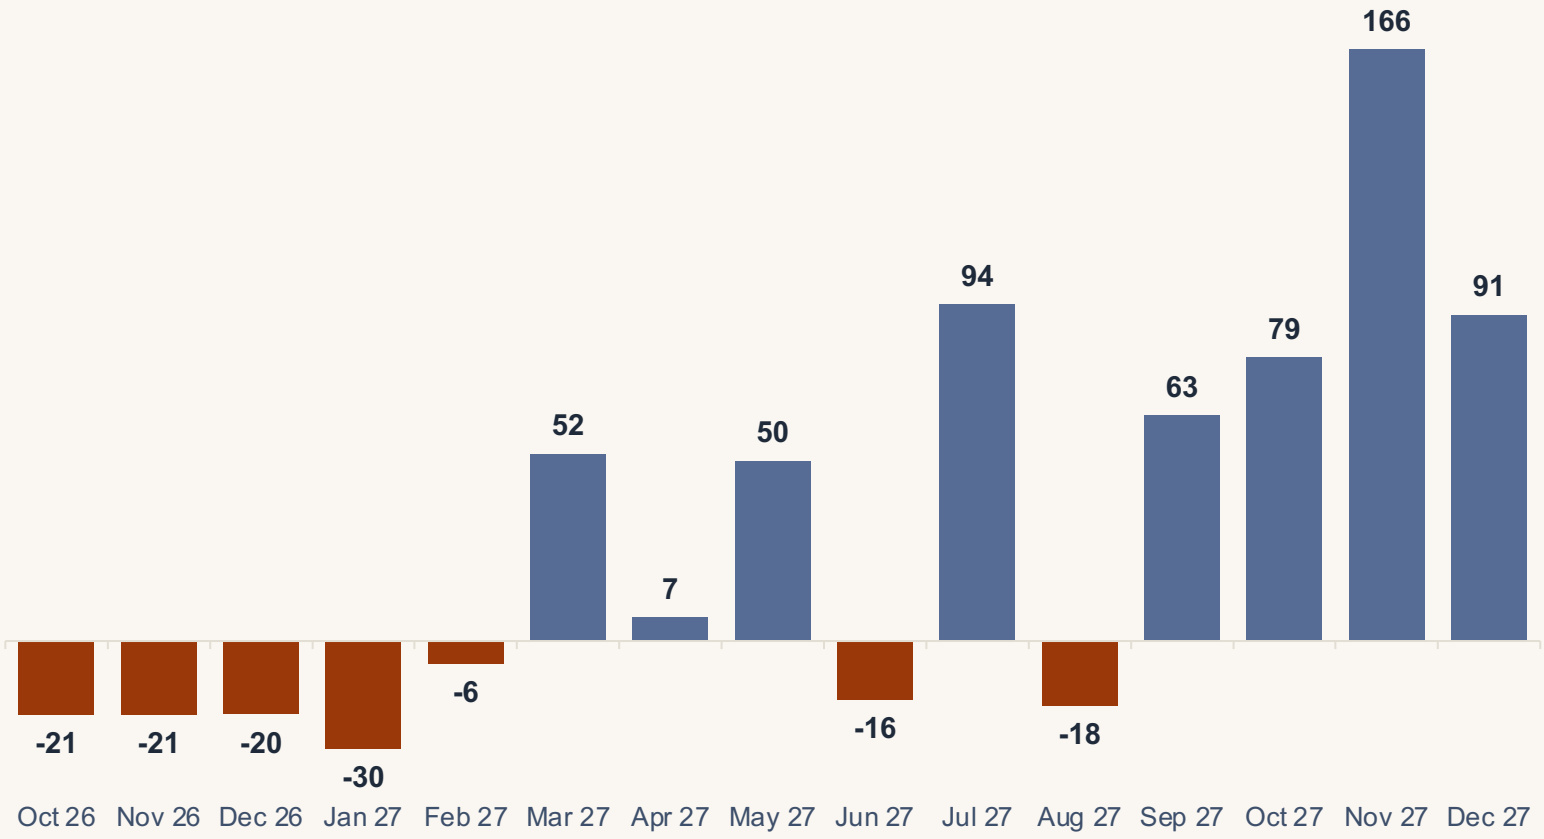

Source: Our model, current estimate for 2027, month by month. Fair-pay floor: Jakarta minimum wage 2026. Before/after scores and EAP renewals: new measures, tracked from Q4 2026.

We lose money in 7 of the next 15 months

OUR GOAL

Salaries come every month, big programs do not. Until March we only pitch, so the good months must carry us.

Net profit each month, Oct 2026 to Dec 2027 (Rp M). Red = a loss.

Rp30M

lost in the worst month (Jan 27)

Rp98M

lost from October to February, while we pitch and sign

Without the cushion,

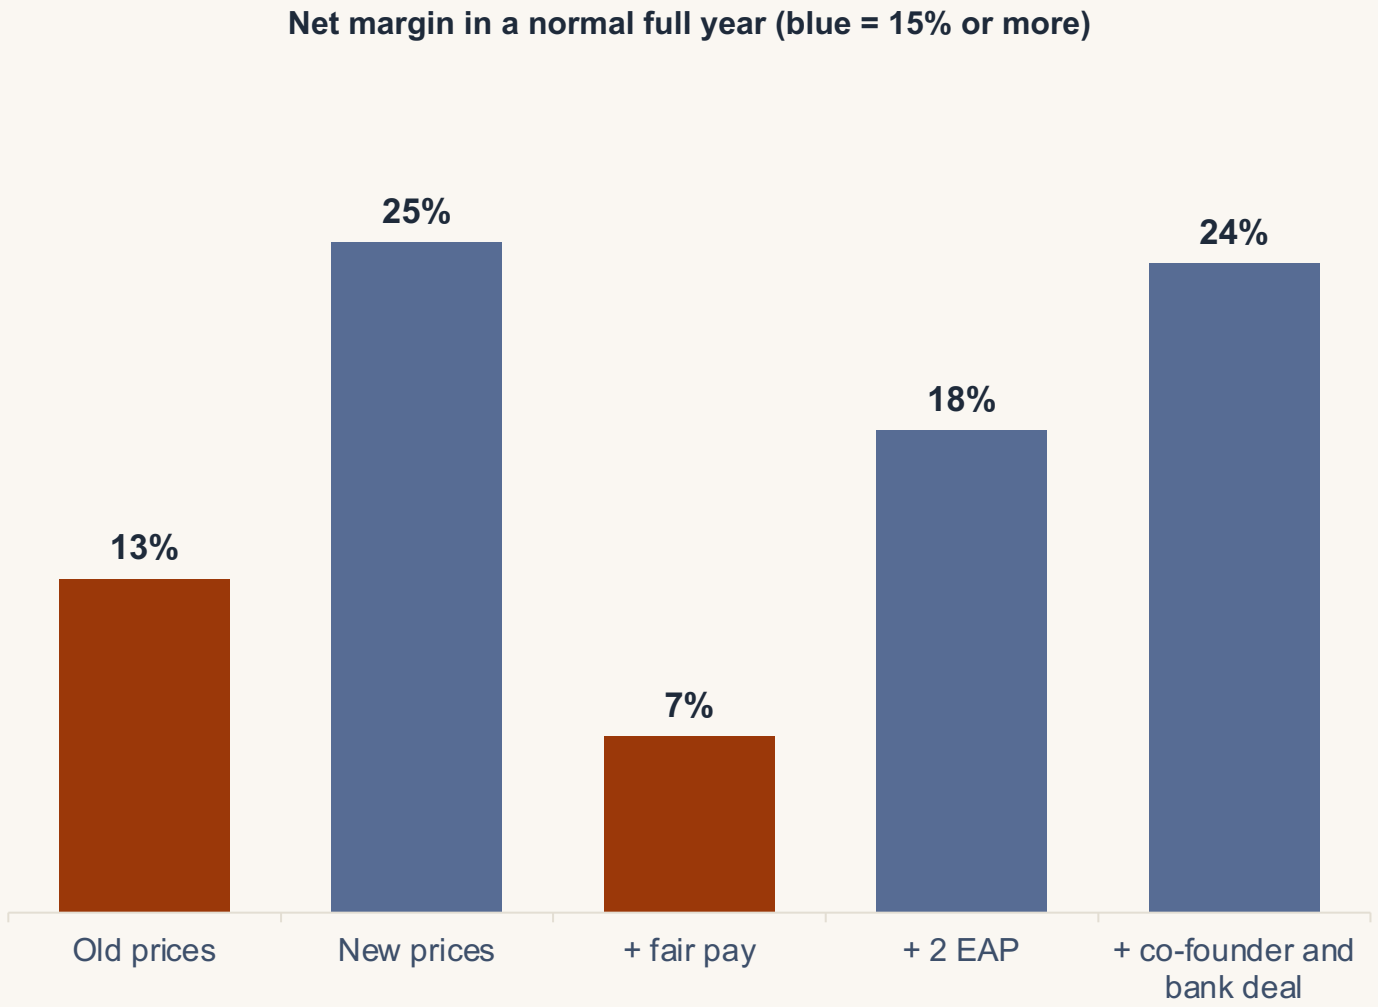

one lost program in a good month can turn the whole year into a loss.

Source: Our model, current estimate for 2027, month by month. Net profit = sales minus all costs and tax.

The new prices work only because pay is low

THE PROBLEM

Fair pay alone drops the margin to 7%. More EAP, not a second price rise, brings it back.

How to read the bars

+ fair pay: costs Rp279M a year.

+ 2 EAP: each contract adds Rp120M of gross profit a year.

+ co-founder and bank deal: 24%.

Why not raise prices again?

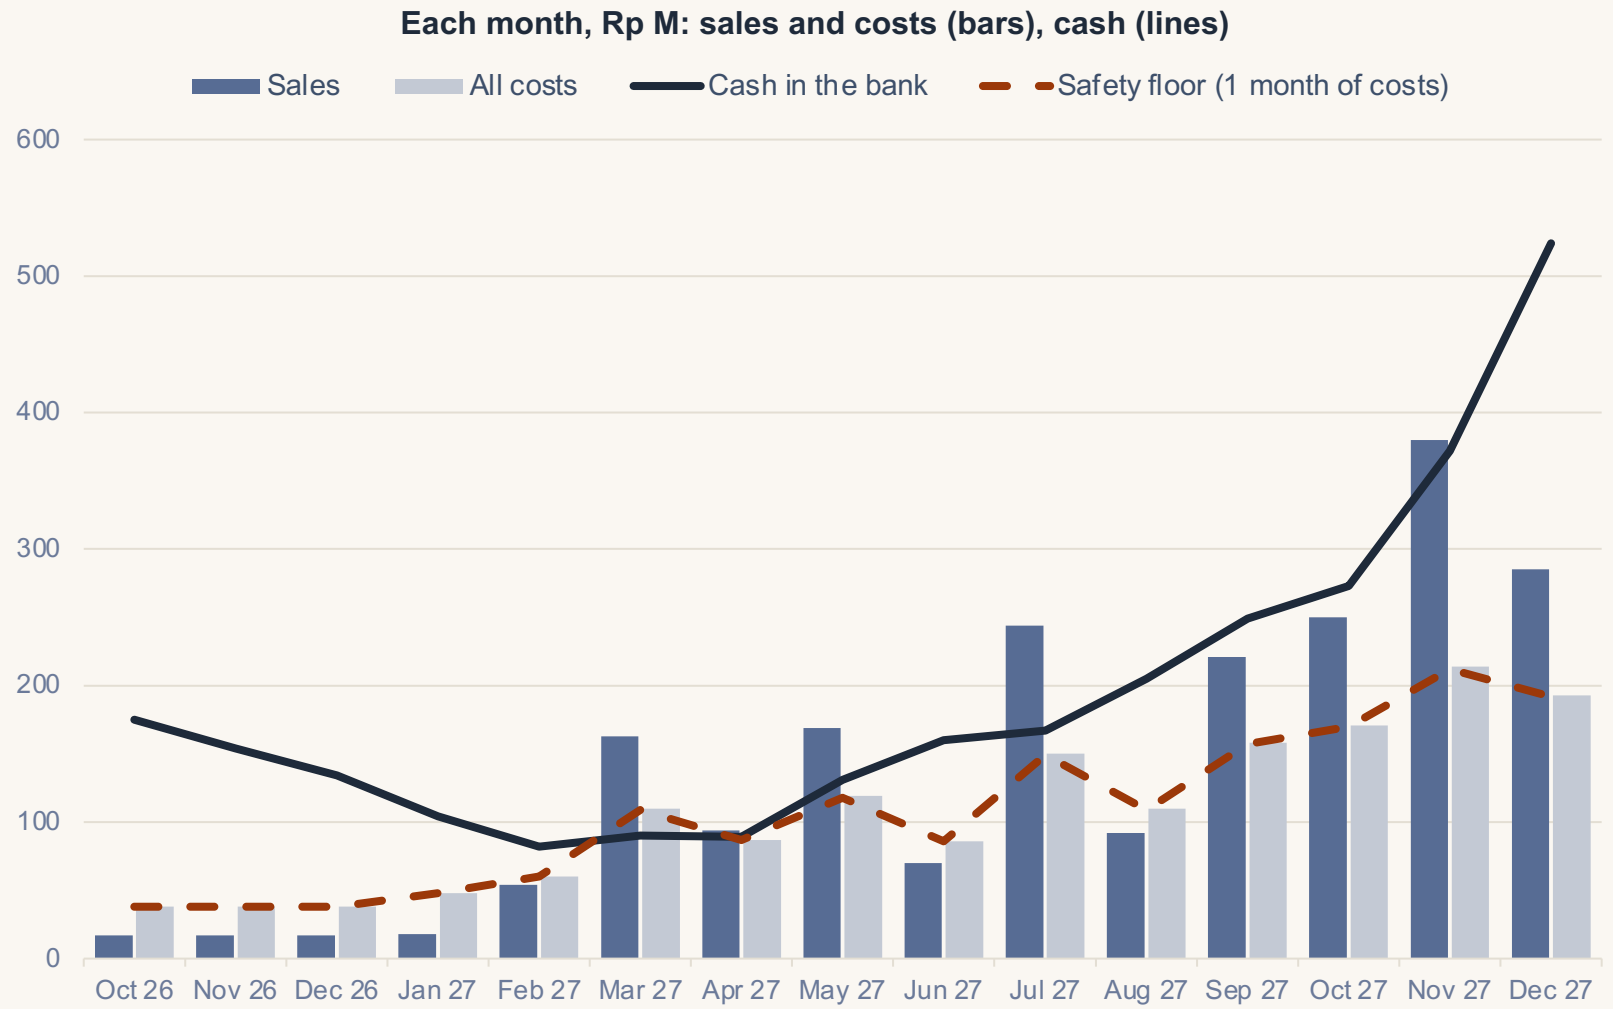

Every event would need +12%: the 3-day program at about Rp116M. Regulators have budget limits, and clients may leave.

Source: Our model, a normal full year at the 2027 sales plan. Fair pay = minimum wage + 18% for BPJS and THR (estimate).

Cash is our weak point: lowest Rp82M in Feb 2027

THE PROBLEM

We pitch and sign from October to February. New work starts in March, and clients pay 0 to 60 days later.

1
months under the red line

Rp524M
cash at end of 2027

Guard rule

If February ends under Rp80M (now: Rp82M), the second founder's pay waits until May and extra ads start in March.

Two more cash levers

A 30% down payment on head-office programs, and 3 events moved to Jul-Sep. All three: lowest Rp107M. More: slide 28.

Source: Our model, current estimate for 2027, month by month (Outlook sheet). No new events before March 2027.

PART A OF D

A

How do we grow B2B, our main engine?

Our answer: Win the head office, spread to its branches, keep the client with EAP, and sell 4 to 6 months before the work.

88%
of 2027 sales

17 Oct
BI proposal deadline

Questions this part answers

- Who do we sell to, and in what order?
- Which deals must we sign, and by when?
- What do we charge, and is it fair?
- When must we start selling?
- How do we depend less on BI?
- Who sells with us, and how are partners paid?

Serves pillars: 1 Clients · 3 Company

Win the head office, spread to branches, keep

A · B2B

Who we serve: financial institutions that must change how people handle money.

1 Start

Head-office trainer program

about Rp100M

3 days, yearly agreement

2 Spread

The same program in each branch

Rp28.5-61M a day

a work order per office

3 Keep

EAP for the client's staff

Rp15M a month

12 months, renews

Who we sell to, in this order

1 BI

46 regional offices

Now: 2027 budget

2 OJK and LPS

head office, then branches

Pitch Jun-Sep 2027 for 2028

3 State banks

BRI, Mandiri and others

EAP 3 and training days, 2027

4 Private banks

learning partnerships

After the first state bank

Why they choose us: psychology-led programs with tests before and after (Coreitera), so the client gets proof of behaviour change, not an attendance list.

Guardrail: we sell proven delivery and results, never 'connections' or access to regulators.

Source: Rate card and Roadmap sheet in our model. Bank buying order: our positioning review, October 2026.

The 2027 deals we must sign, and by when

A · B2B

Regulators and banks plan budgets a year ahead, so most of 2027 is decided in the next three months.

Deal	2027 value (Rp M)	Start pitching	Signed by	Owner	Status today
BI 2027: head-office and regional programs	984	17 Oct 2026	18 Jan 2027	Kia	Start now
EAP 2: the warm lead	165	4 Dec 2026	18 Jan 2027	Galih	On track
EAP 3: a bank	90	17 Oct 2026	20 May 2027	Kia	Start now
Bank agreement: training days	374	17 Oct 2026	20 Aug 2027	Kia, then BD co-founder	Start now
OJK and LPS programs for 2028	2028	17 Jul 2027	19 Jan 2028	Kia, then BD co-founder	On track

Rp1,614M

of 2027 sales still to sign

17 Oct

BI proposal deadline: inside BI's 2027 budget window

How we sell

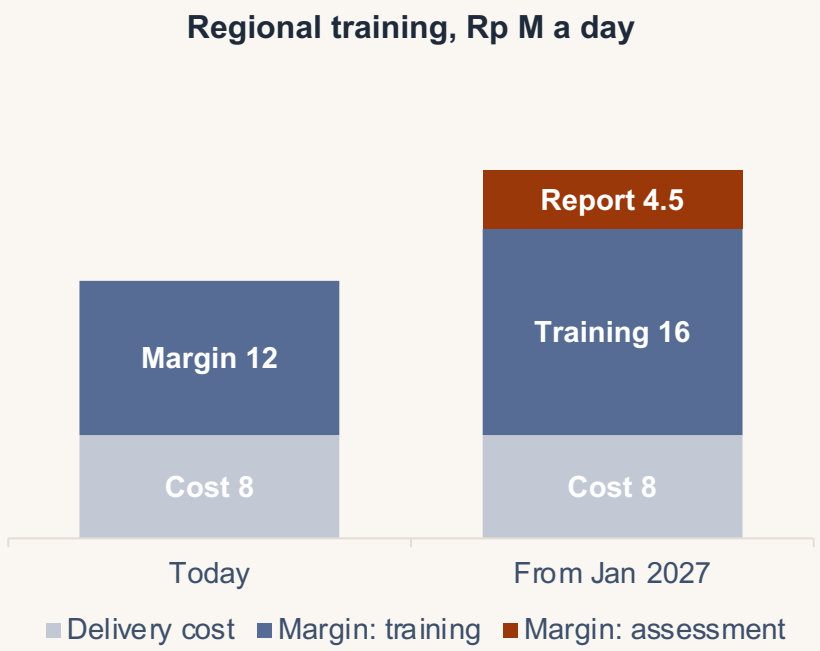

- One full-year proposal per client, not one event at a time
- Ask for a 30% down payment on head-office programs, and EAP billed a quarter ahead
- Log every deal's real dates in the Roadmap sheet, so next year's plan uses our own speed

Source: Roadmap sheet in our model (lead times are estimates). Values: current estimate for 2027.

Regional training: Rp20M now, Rp28.5M in 2027

A · B2B

It costs us Rp8M to deliver. So we keep Rp12M today, and Rp20.5M at the new price.

Product	Today	New	Our cost	We keep
Regional training (BI offices, LPS), a day	20	28.5	8	12 → 20.5
Head-office trainer program, 3 days	85	100	25	60 → 75
State bank program, a group a day	35	51	12	23 → 39
Private bank program, a group a day	35	61	12	23 → 49
EAP for client staff, a month	15	15	5	10 → 10
Public event (new price is a proposal)	20	24	8	12 → 16
Counseling, a session	1	1	0.4	0.6 → 0.6

12 → 20.5
Rp M we keep a day

+Rp145M
more margin in 2027 (17 regional days)

New price = training + assessment and impact report (Rp150k a participant). Add-ons: Bank Elite +30% (trainer licence + 3 months follow-up); Theta app Rp5k a staff a month.

Rules: price at least 3 times cost (training floor: 3 × Rp8M = Rp24M) · discounts at most 10% · first pilot at most 20% off · client pays travel · a regulator price rise always comes with a new item

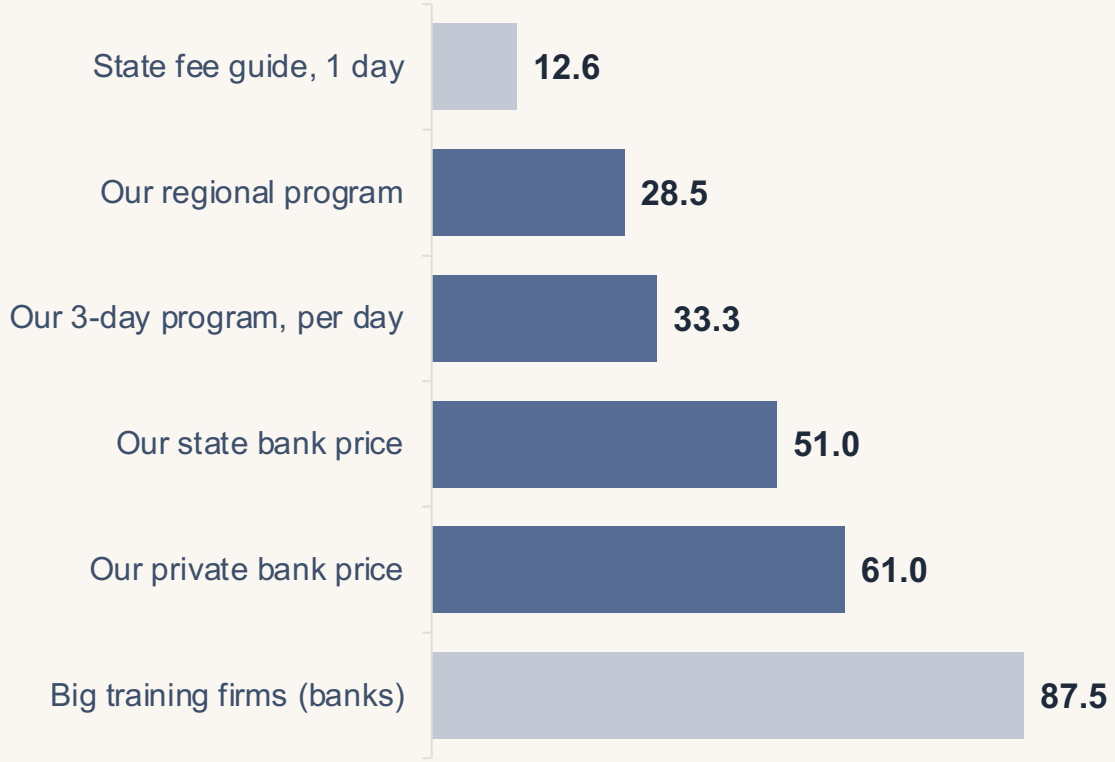

Source: Rate card and delivery costs in our model (Inputs). Margin = price minus delivery cost, before salaries and office. The Coreitera assessment fee is already inside the delivery cost.

Our prices sit between the state guide and big firms

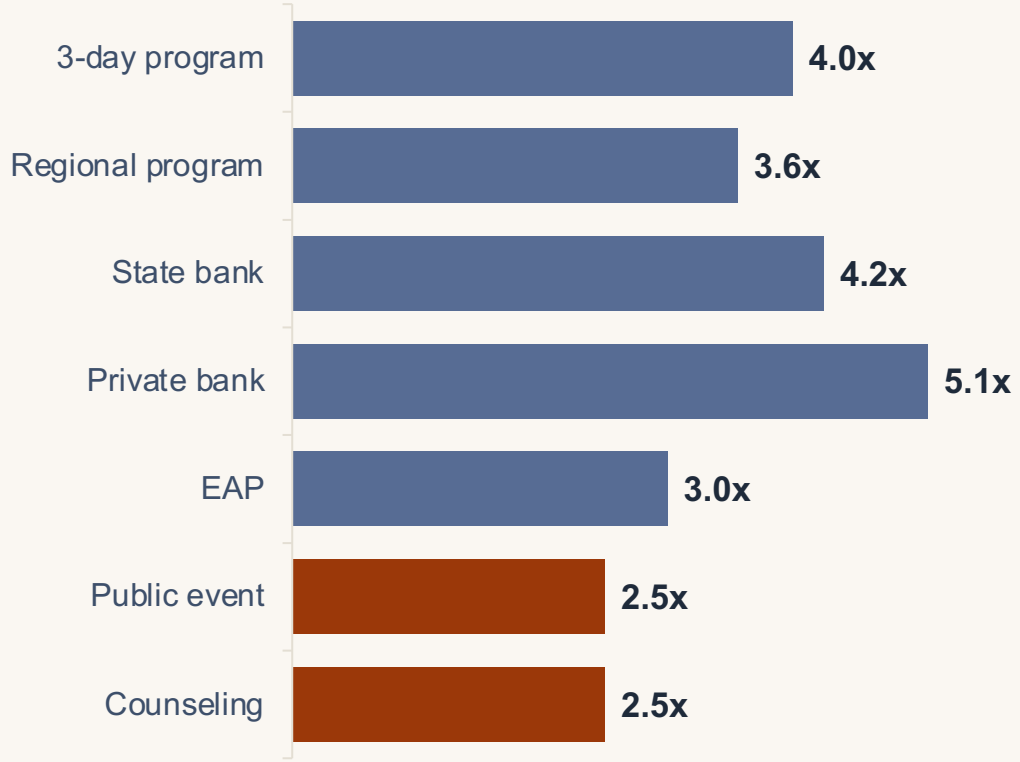

A · B2B

Blue = our prices. Grey = outside prices. Red = below our 3 times rule.

Price for one training day (Rp M)

Price divided by our cost (rule: 3 or more)

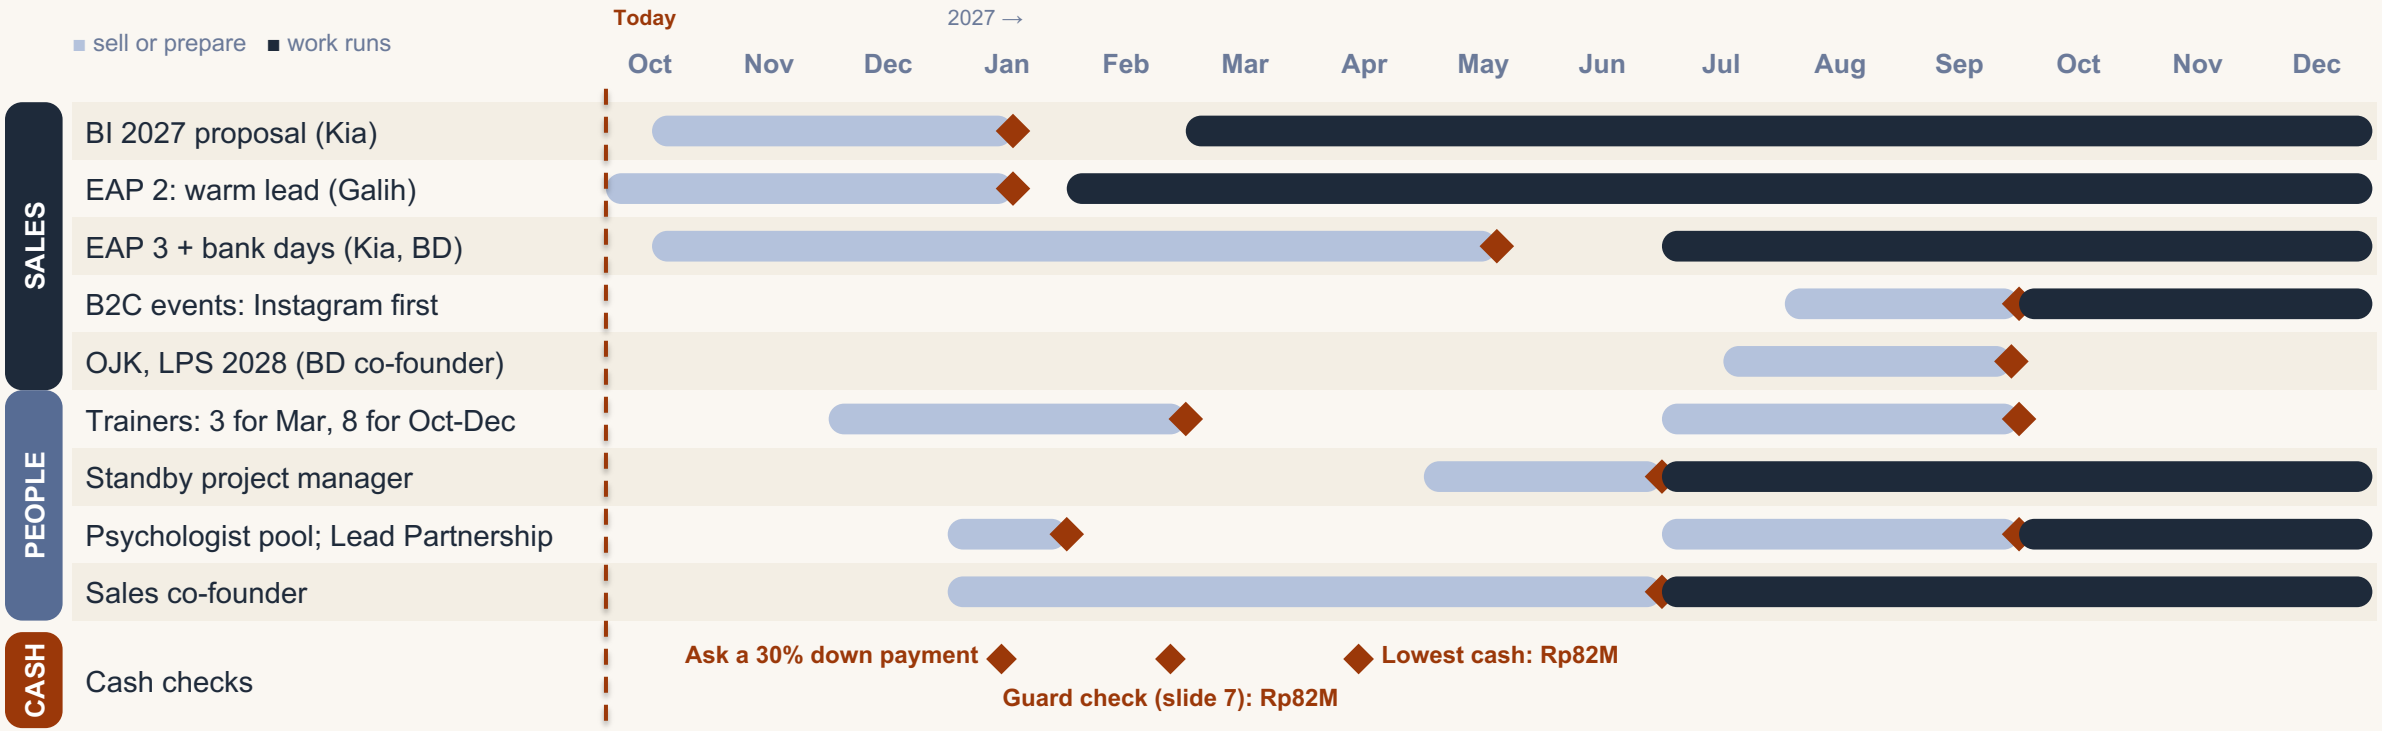

Two changes: raise public events to Rp24M. Keep counseling at Rp1M: it brings new clients and is only 1.5% of sales.

Source: State fee guide: Finance Ministry SBM 2026 (PMK 32/2025), 1-day ToT. Big-firm rate: founders' estimate (2.5x our old bank price).

Start selling 4 to 6 months before the work

A · B2B

Regulators and banks plan next year's budget now, so this quarter decides most of 2027.

This month

1. **BI (Kia):** one full-year 2027 proposal by 17 October; ask for a 30% down payment.
2. **EAP (Galih):** chase the warm lead; sign by mid-January.
3. **People:** start the BD co-founder search; agree the target-based pay scheme; register BPJS.

26.1%
net margin 2027, current estimate

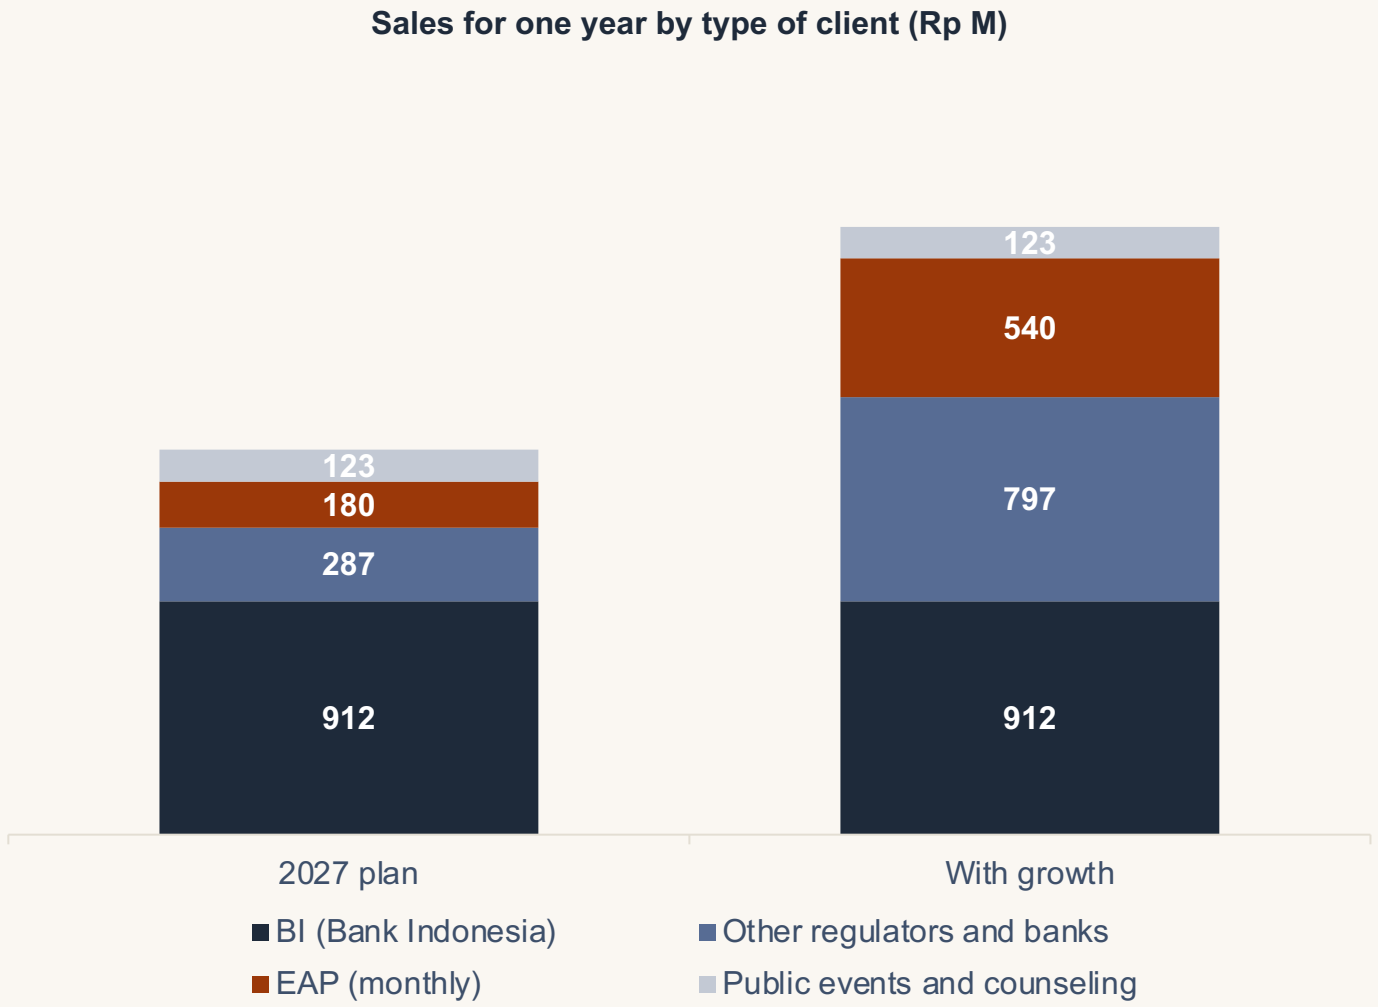

Rp107M
lowest cash with the guard rule and both cash levers

Source: Roadmap sheet in our model. Lead times are estimates until we log real deals.

EAP and banks cut our BI share from 61% to 38%

A · B2B

BI stays the same size in rupiah. Other clients grow around it.

61% → 38%

BI's share of our sales. Target: below 40%, so one budget cut cannot sink us.

12% → 23%

monthly EAP income: it comes in quiet months too.

Investors like both:

many clients, and income that repeats every month.

Source: Our model, a normal full year at the 2027 sales plan. 'With growth' = 2 more EAP contracts and 10 bank training days.

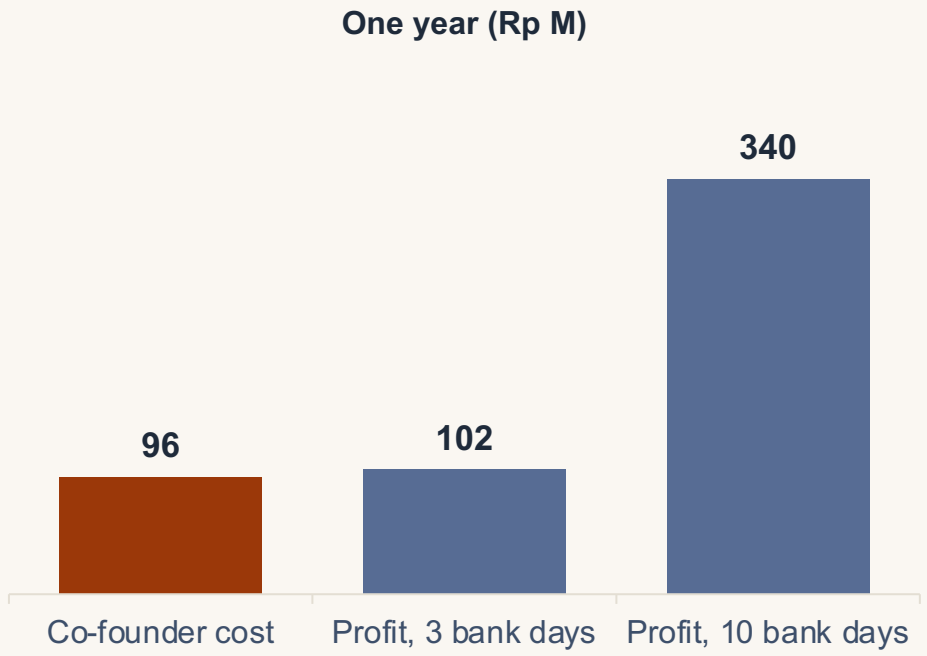

Hire a sales co-founder first

A · B2B

3 bank training days pay their cost; 10 days pay it more than 3 times.

Question	Sales co-founder	Marketing co-founder
Fixes our biggest limit?	Yes: founders do all sales; one is in Singapore	No: marketing does not close regulator deals
How do clients buy?	Regulators and banks buy on trust	Ads help the public side most
Could we hire staff instead?	Hard: good sellers to regulators are rare	Yes: staff + ads cost about Rp15M a month
Our choice	First	Later, or as staff

Co-founder = a partner who owns part of the company. Shares are earned over time, so a partner who leaves early does not keep them.

The deal

About Rp8M a month + shares earned over 4 years (none if they leave in year 1).

Year-1 goals: 1 bank agreement, a first OJK or LPS program, 2 EAP renewals.

Source: Our model, a normal full year at the 2027 sales plan. Profit per bank day = Rp51M price minus delivery and project manager cost. Check share terms with a lawyer.

Partners earn commission only after clients pay

A · B2B

A commission-only partner opens banks and companies for us. The price list is the floor; profit stays above 15% per deal.

Non-EAP deals

10% / 12.5%

of event profit for closing deals 1-4 / from the 5th; no commission for only introducing

EAP

Rp1.5M fixed

per new annual contract (Rp0.5M for a 3-month package, Rp1M per renewal)

Above the list price

30%

of the amount above the list; nothing below the list without the Director

6-month bonus

Rp1M to Rp18M

from Rp50M of deals in 6 months; our packages are big, so 1 EAP + 1 training day already passes it

What it does to our 2027 margin (now 26.1%)

If the partner...	Partner earns	Our margin
closes the bank deals already in our plan	Rp53M	23.5%
adds Rp200M of new sales	Rp21M	29.1%
adds Rp400M of new sales	Rp37M	31.8%
adds Rp600M of new sales	Rp64M	33.6%

Read it: paying commission on deals we would win anyway costs margin. Paying it on new deals raises margin, because our running cost does not grow with them.

Guardrails in the contract: every deal keeps at least 15% margin after commission · renewal commission only with client contact we can verify, and it ends after 24 months · one institution with many offices (BI and its regional offices) is one client · paid only after the client pays.

Source: Partner contract (Pasal 4-9) and partner deck 'Program Mitra'. Our model, current estimate for 2027, month by month. Partner scenarios are estimates, not in the model yet.

PART B OF D

B Can B2C pay for our clinic?

Our answer: Yes, from about April 2027: Instagram, referral and Theta vouchers grow B2C until it pays our part-time psychologists.

12%
of 2027 sales

4.2x
referral: profit per client / cost

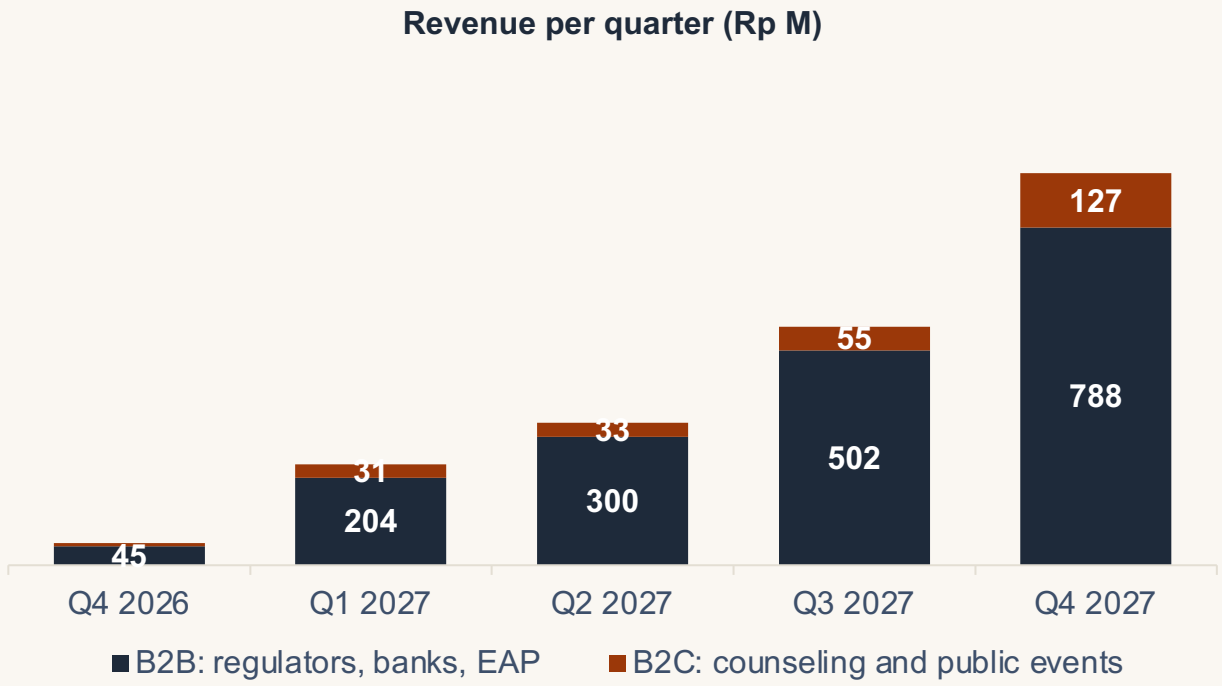

Questions this part answers

- How do followers turn into paid sessions?
- What does it cost to win one client?

Serves pillars: 4 Community · 2 People

B2C grows to 12% of sales and pays our psychologists

From Apr 2027, counseling profit pays our 2 part-time psychologists. Bookings matter more than followers.

Per quarter (our levers)	Q4 2026	Q1 2027	Q2 2027	Q3 2027	Q4 2027
Follower growth	15%	25%	28%	28%	24%
Bookings per 1,000 followers	0.58	0.70	0.85	1.00	1.00
Sessions per client	1.00	1.10	1.25	1.40	1.40

3.6k → 10k
Instagram followers, Oct 2026 to Dec 2027

2 → 24
paid counseling sessions a month

Rp246M
B2C revenue in 2027, incl. 4 public events

4.8x
psychologists' pay covered by B2C profit, Dec 2027

When can we hire a full-time psychologist?

When counseling profit pays the lead part-timer plus a full-timer: about Rp13M a month for 3 months. Dec 2027: Rp13.4M. So early 2028, not 2027. Until then: one more paid part-timer, plus our pool of 20.

Watch: 8+ paid sessions a month by March, 13+ by June. If not, cut the extra ads back to Rp1M.

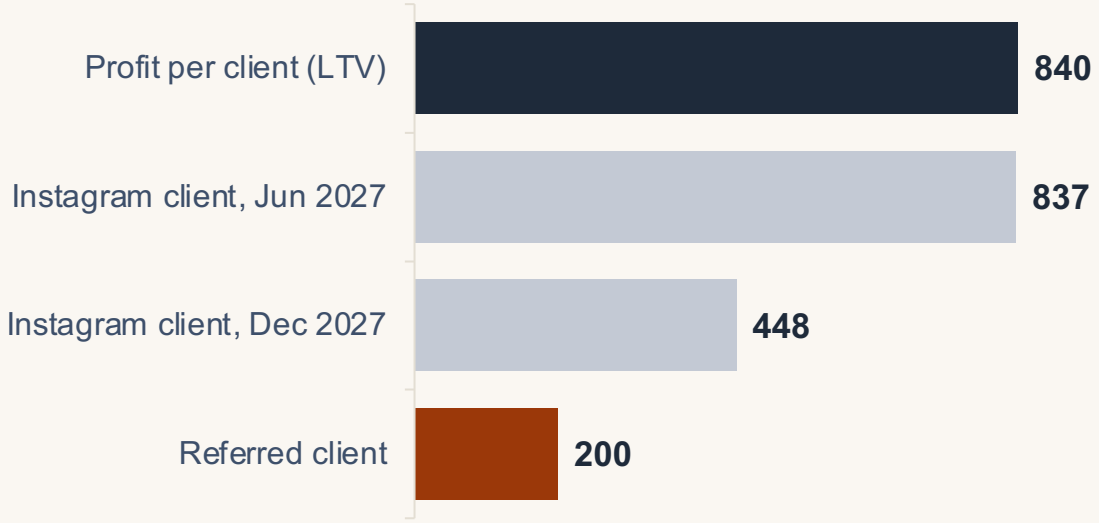

Source: Our model, current estimate for 2027, month by month (B2C sheet). Followers: @temanjourney_id on 5 Oct 2026. Today about 2 paid sessions a month.

Referral wins a client at a quarter of the ad cost

B · B2C

We ask every new client where they came from, and give a small session credit to clients who bring a friend.

Profit per client vs cost to win one client (Rp thousand)

4.2x
profit per client ÷ cost, referral

0.9x → 1.9x
same for Instagram ads, Jun to Dec 2027

1. **Ask the source**
   One required question at every booking: Instagram, friend (code), Theta voucher, company, event, other
2. **Give a code**
   After the first session: a personal code (e.g. TJ-ANDI24) by WhatsApp template
3. **Track in one sheet**
   Date, client ID (no names), source, code, sessions, revenue, reward. Admin fills it
4. **Review monthly**
   New clients by source, referral share (target 20% by Q4 2027), cost per client by channel

Fair and ethical: the reward is a session credit, never cash. No testimonials. Referring is the client's choice, and we never tell anyone who referred whom (HIMPSI code). Lead marketing owns the referral KPI.

Source: Our model, current estimate for 2027, month by month (B2C sheet, unit economics). Ads: Rp4.5M a month in total. Reward: Rp100k credit to each side.

PART C OF D

C Who do we hire, and when do we pay more?

Our answer: No signed work, no hire. Pay rises when sales targets are met, and we fix each limit before it stops us.

Rp88M
running cost a month, Oct 2027

3
pay steps, unlocked by sales

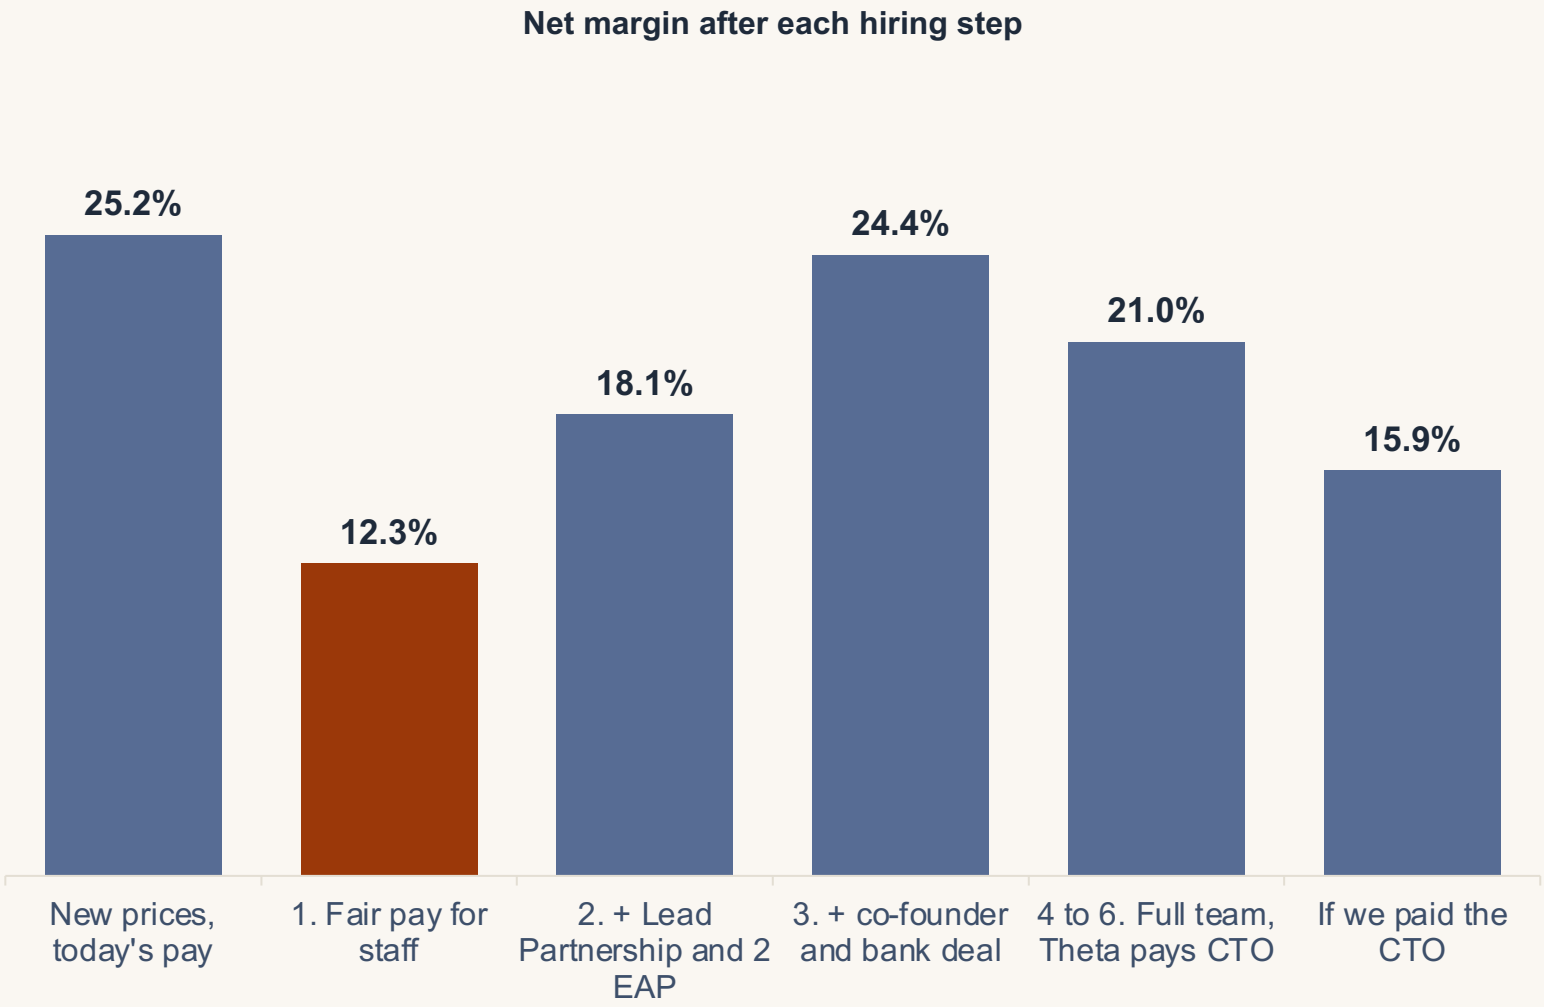

Questions this part answers

- When do we hire?
- When does pay rise?
- How does our running cost grow?
- What limits us, and when?
- How do we treat each type of worker?

Serves pillars: 2 People

Every hire comes with the work that pays for it

No signed work, no hire. Red bars fall below our 15% target.

12.3%

if all staff get fair pay at once. So in 2027 pay rises in steps (slide 22).

15.9%

if Teman Journey paid the CTO. So Theta's own income pays the CTO.

The rule

A new person and the new work that pays for them arrive together.

Source: Our model, a normal full year at the 2027 sales plan. Net margin after each step.

Pay rises when sales targets are met

A step unlocks when average sales of the last 3 months reach the target, and never goes back down.

Role	Now	Step 1: sales Rp100M+	Step 2: sales Rp150M+	Step 3: sales Rp200M+	Monthly KPI and bonus
Admin	1.8 + Rp17k a client + 0.62 bonus	same	at least 5.73	same	Invoice within 2 working days of client sign-off; reply to bookings the same day
Social media	1.5	3.0	4.5	5.73	3 posts a week; followers on track to 10k; Rp25k for each paid session booked through Instagram
Lead marketing (has shares)	2.5	4.0 (cap)	4.0	4.0	10k followers by December; ads must earn 3 times their cost (ROAS 3x)
Psychologist (part-time)	2.3	2.3	2.3	2.3	No full-time hire for now
Lead Partnership	-	-	6 (Oct 2027)	6	Starts when 3 EAP contracts run; brings EAP clients (estimate)
Founders	10 (one paid)	25 from March (room for both)	25	25	Rp10M for one founder is the minimum; the second start follows the guard rule

May 2027
Step 1 in the current estimate

Aug 2027
Step 2 in the current estimate

Dec 2027
Step 3 in the current estimate

Always: BPJS and THR (18%) from January. Below-minimum pay is agreed in writing (PP 36/2021).

Source: Our model, current estimate for 2027, month by month (Pay_Plan sheet, rows 27-30). Rp M a month. The Instagram booking bonus is new and not yet in the model.

Our team and running cost grow in steps

From Rp32M to Rp88M a month. Each column shows only what is new; each step follows signed work.

Now (Oct 2026) Rp32M a month	Jan 2027 Rp42M a month	Mar 2027 Rp59M a month	Jul 2027 Rp74M a month	Oct 2027 Rp88M a month
Trigger: Today	**Trigger:** New prices start	**Trigger:** New work; EAP 2 since Feb	**Trigger:** EAP 3; sales over Rp100M	**Trigger:** 3 EAP; sales over Rp150M
Founders x2 (one paid, Rp10M)	BPJS + THR for all staff	Room for both founders (Rp25M)	Pay step 1 (since May): social media Rp3M, lead marketing Rp4M	Pay step 2: admin at minimum wage, social media Rp4.5M
Lead marketing (semi full-time, has shares)	Instagram ads Rp4.5M in total	EAP part-time psychologists (per session)	Sales co-founder	Lead Partnership (non-psychologist)
Social media	Pay scheme: rises unlock with sales targets		EAP contract 3	Bank training days
Admin (base + fee per client)	Magang Nasional intern (bonus, if approved)		Standby project manager (per project)	Intern for invoices (from Sep)
Lead psychologist, part-time				
2 interns				
Project manager (per project)				
2 trainers (per event)				

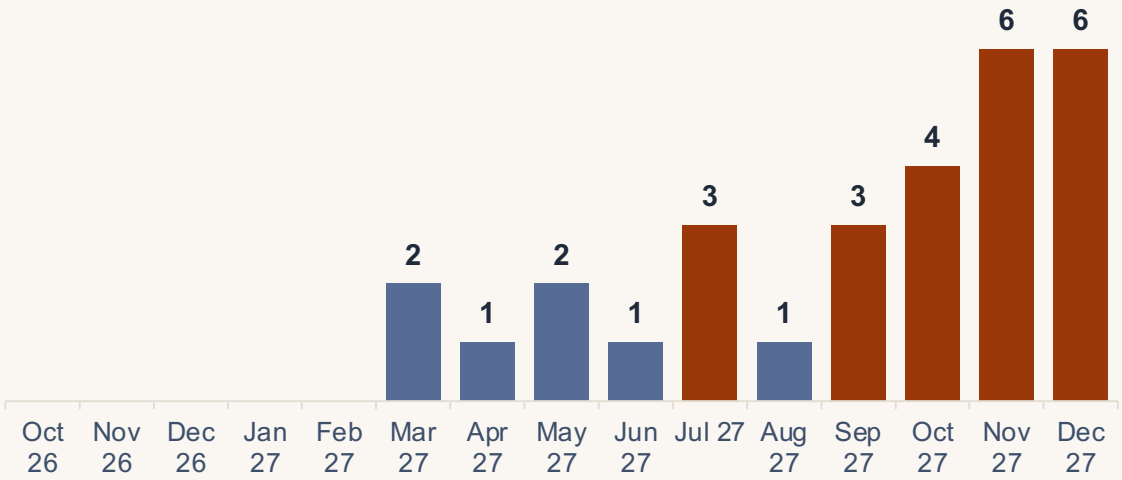

Source: Our model, current estimate for 2027, month by month (Pay_Plan sheet). Per-project and per-session people are paid only when there is work.

Our limit moves during the year

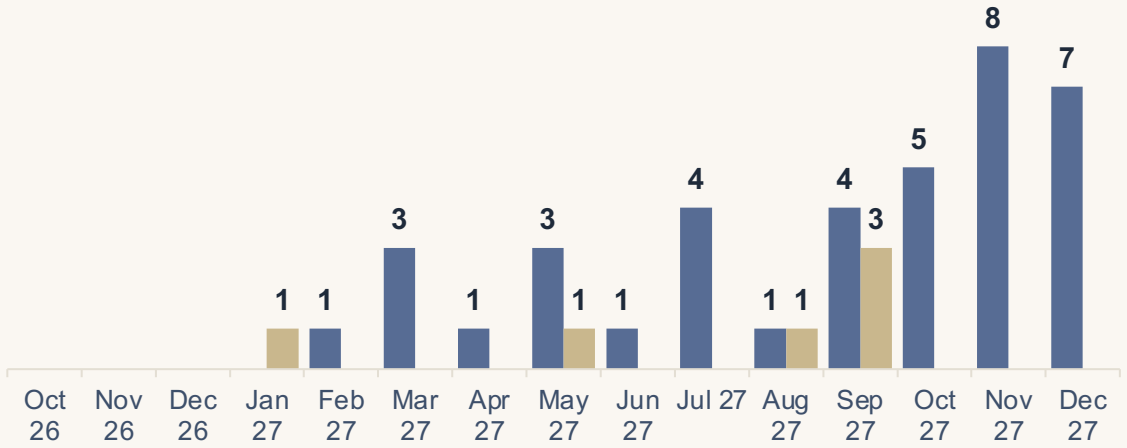

C · PEOPLE

Founders' selling time now, the project manager from July, trainers from October.

Projects per month (one project manager runs 2)

Trainers needed (blue) and new trainers certified 2 months earlier (sand)

Founders' selling time
Oct 2026 to Feb 2027

Why: 4 to 5 new clients, about 40 hours each; one founder is in Singapore.

Fix: Kia (CEO) leads BI and banks; Galih leads EAP 2 and people.

Project manager
Jul to Dec 2027

Why: Up to 6 projects a month: 3 times what she can run.

Fix: A standby project manager at Rp2M a project, booked by May.

Trainers
Oct to Dec 2027

Why: 8 needed in the busiest month; we have 2 today.

Fix: Recruit in July, certify by September. 8 is enough, not 11.

Source: Our model, current estimate for 2027, month by month (capacity rows). One event = one project. Each trainer runs at most 2 events a month.

Treat each type of worker differently

Sort our people by how hard they are to replace and how much they affect our results.

How hard to replace them

Hard to replace, smaller effect

Project manager: only 1 person

Trainers: 2 today, up to 8 needed

Do: Secure them

Hard to replace, big effect

Lead psychologist (part-time)

Lead trainers that regulators trust

Do: Long-term partnership, fair pay, a career path

Easy to replace, smaller effect

Event helpers, design, interns

Venue and travel (client pays)

Do: Keep it simple, pay per day

Easy to replace, big effect

Part-time psychologists for EAP

Many licensed psychologists in Jakarta

Do: Build a group, pay per session

How much they affect our results and our clients' trust

Rp48M

a year: all we save if we cut delivery costs by 10%. Keeping people matters more.

What this means

- Do not cut pay: the right price is not the lowest price.
- One project manager and two trainers limit how much we can sell.
- Pay part-timers per piece of work, so quiet months do not burn cash.

Source: Kraljic, P. (1983), Purchasing must become supply management, Harvard Business Review. Team numbers from our model.

PART D OF D

D Is our cash safe, and when can we invest?

Our answer: Safe in all three estimates if we sell early and get paid earlier. We invest only above a 6-month cushion.

26.1%
net margin, current estimate

Rp82M
lowest cash, Feb 2027

Questions this part answers

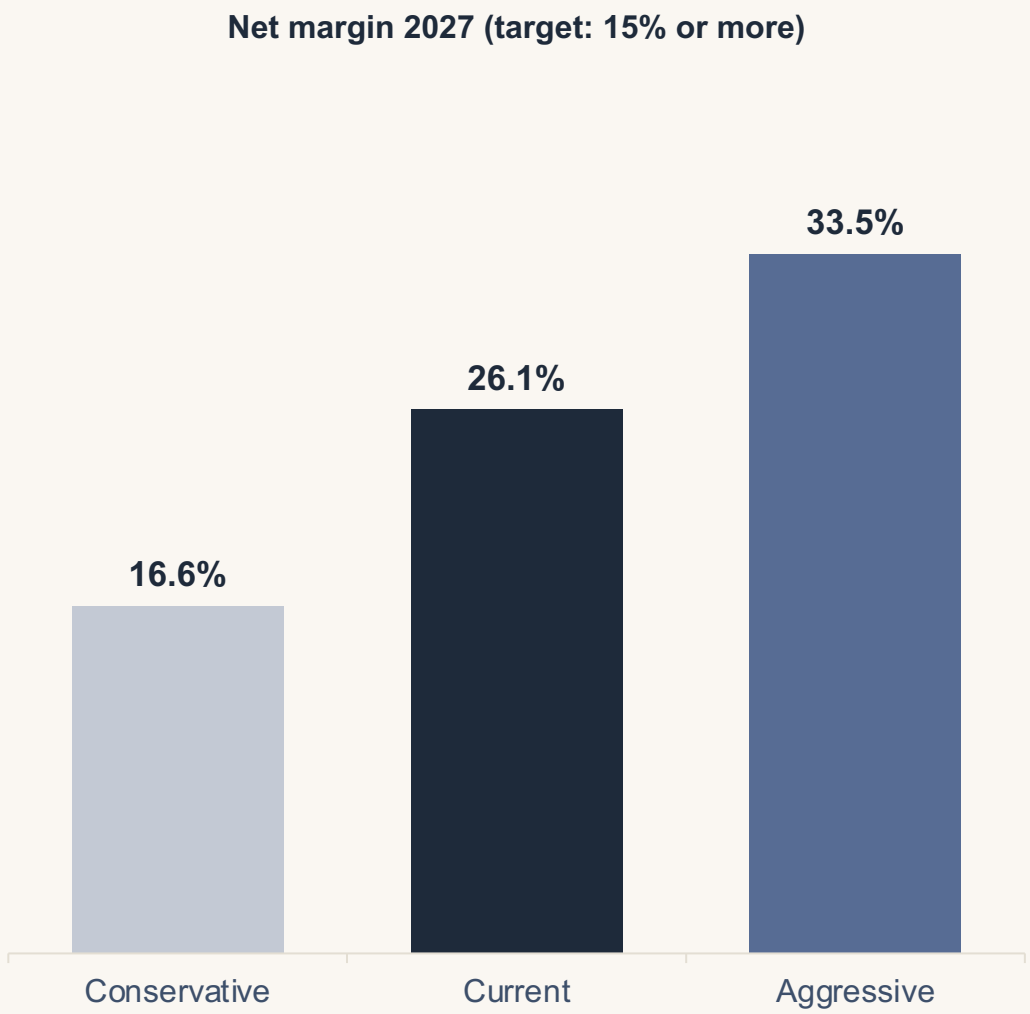

- What if the year is bad, or good?
- How do we protect cash until March?
- When can we invest in new units?

Serves pillars: 3 Company

Three estimates: a bad year, our plan, a good year

D · MONEY

Even in the bad year the margin stays above 15%, because pay steps and hires wait for sales.

2027	Conservative	Current	Aggressive
What it assumes	BI buys 30% less, no bank deal	our plan	bank deal from July, 2 days a month
Sales (Rp M)	1,606	2,040	2,521
Net profit (Rp M)	267	532	845
Lowest cash (Rp M)	67	82	82
Cash at end of 2027 (Rp M)	328	524	779
Months below the safety floor	4	1	2

What makes the bad year safe: the pay steps do not unlock, no one is hired without signed work, and B2C pays our psychologists. What makes it unsafe: cash in February to April, so the guard rule stays.

Source: Our model, current estimate for 2027, month by month; every estimate recalculated in Excel.

Protect cash in the pitch months

Oct to Feb: we earn about Rp11M a month after delivery costs, but running cost is Rp32M to Rp42M a month.

#	Step	Cash gained	What it takes	When
1	Keep the extra Instagram ads, and check the return every month	Rp0: ads pay for themselves	Break-even: 6 paid sessions a month from ads (ROAS 1.7x). Target 3x	Do now
2	Pay rises unlock with sales targets, not dates (slide 22)	about +Rp7M by Feb, more in 2027	Agree the scheme with staff now	In the plan
3	Bill EAP 2 one quarter in advance	about +Rp30M by Feb	Maybe a 2-3% discount	Do now
4	30% down payment on the March head-office program, paid in February	+Rp30M by Feb	Ask BI in the 17 October proposal	Do now
5	One public event between December and February	about +Rp12M	Team time in pitch season	Do now
6	Second founder's pay waits longer. One founder's Rp10M is the minimum and stays	+Rp15M a month of delay	Founders' decision	Reserve
7	Smaller office or coworking space in the pitch months	about +Rp15M	Only if the lease allows	Reserve

Check first: was September's EAP invoice sent (about +Rp15M in October)? What do our 4 small corporate clients pay, and when? Can the office lease change?

Rp82M → Rp112M
cash at the end of February, with step 4

Rp82M → Rp90M
lowest cash in 2027, with step 4

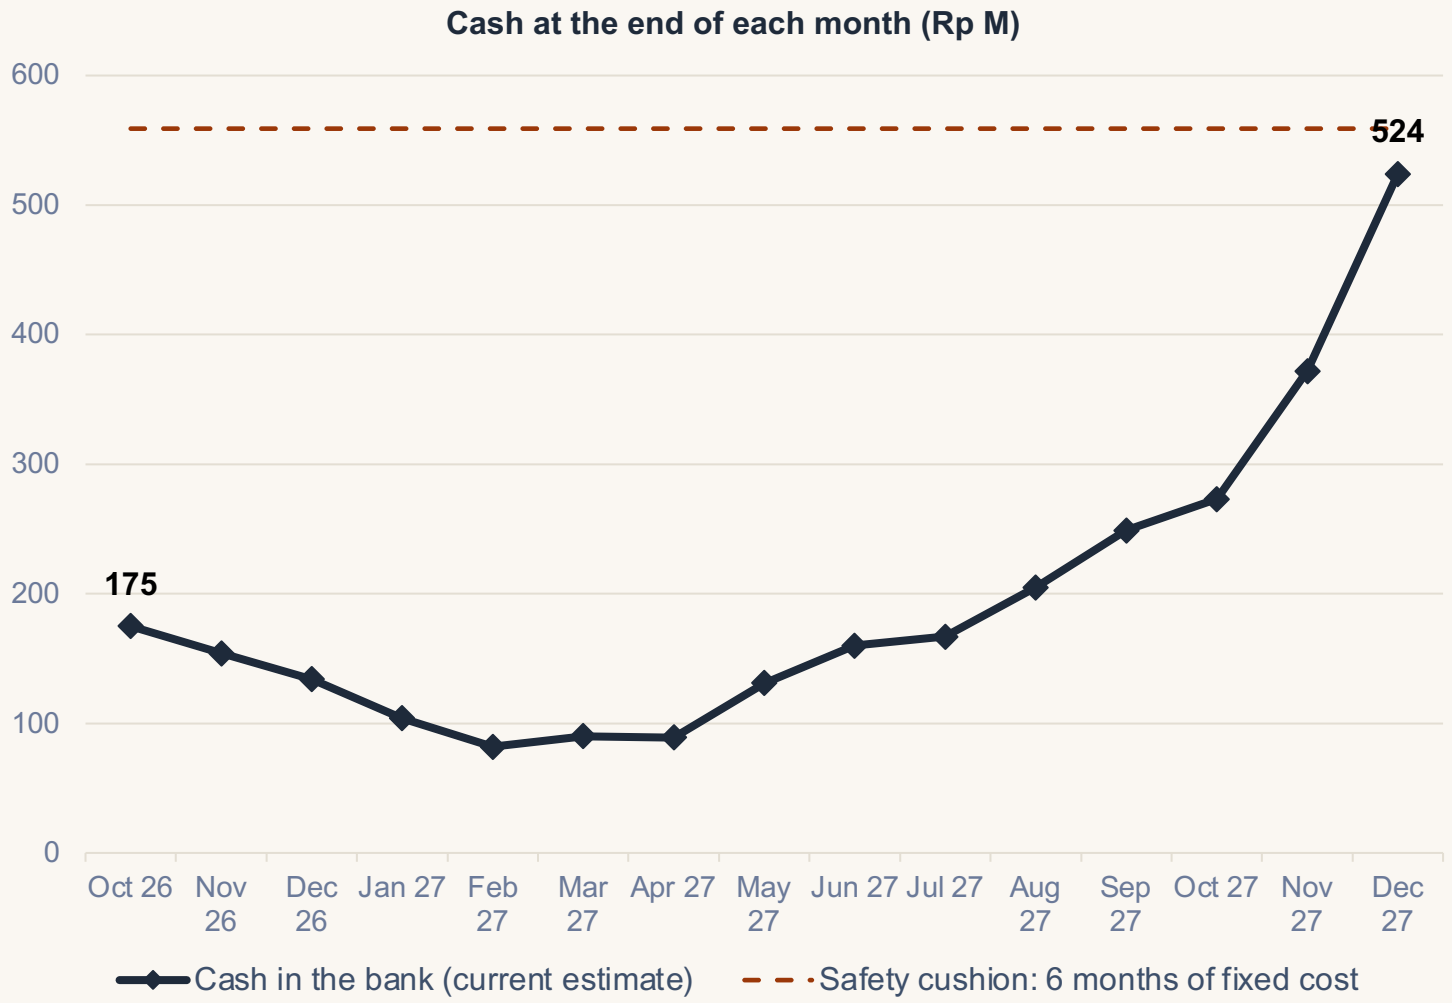

+Rp42M
more by February if steps 3 and 5 also work (estimate)

Do not cut: sales travel, trainer certification in January, BPJS and THR, and founder pay below Rp10M.

Source: Our model, current estimate for 2027, month by month. Steps 2 and 4 recalculated in Excel; steps 3, 5, 6 and 7 are estimates.

Invest in new units only above a 6-month cushion

The cushion is about Rp559M. Cash is Rp524M at the end of 2027, so the earliest start is January 2028.

1

Keep the cushion

About Rp559M stays in the bank for bad times.

2

Invest above it

Up to half of each year's net profit goes to new units, such as Theta and Coreitera.

3

How much

A normal full year makes about Rp579M, so about Rp290M a year for new units.

Source: Our model, current estimate for 2027, month by month (Outlook sheet).

WHAT WE DO NOW

What do we do in the next 90 days?

Our answer: Eight actions with an owner and a date, and six decisions only the founders can make.

17 Oct
first deadline: BI proposal

Kia + Galih
owners until the BD co-founder joins

Questions this part answers

- What must happen, by whom and by when?
- What must the founders decide?

A B2B | **B** B2C | **C** People | **D** Money

The next 90 days: who does what, by when

NEXT STEPS

Owners for now: Kia (CEO) and Galih, until the BD co-founder joins. Review every Monday for 30 minutes.

#	Action	Owner	By when	If it slips
1	BI: one full-year 2027 proposal; 3 events moved to Jul-Sep; 30% down payment	Kia	17 Oct 2026	Escalate to the regional offices
2	Start the BD co-founder search	Kia and Galih	Oct 2026	Founders keep selling alone
3	Hire the second paid part-time psychologist (starts January)	Galih	30 Nov 2026	Pool of 20 covers evenings
4	Banks: put EAP 3 and training days into their 2027 budgets	Kia	31 Dec 2026	Bank deals move to 2028
5	EAP 2: sign the warm lead, billed a quarter ahead	Galih	15 Jan 2027	No EAP 2 by 15 Dec: delay the April pay step
6	Pay scheme in writing with staff; BPJS registered	Kia	31 Dec 2026	No pay change without it
7	Booking link, session packages and referral tracking live	Galih + admin	31 Jan 2027	Cut extra ads to Rp1M
8	Certify 1 more trainer for March; one public event	Galih	Feb 2027	No BI work order by 31 Jan: March slips

Source: Roadmap sheet in our model and the stop dates on the risks slide.

What we need to decide now

NEXT STEPS

Each decision changes a number in this plan. Our proposal is in each box.

Second founder's pay

Room of Rp15M a month from March; the guard rule says wait until May if February cash is under Rp80M.

Decide by: End of Feb 2027

Sales targets for pay steps

Rp100M, Rp150M and Rp200M a month (3-month average). Agree them with staff in writing.

Decide by: Dec 2026

Lead Partnership hire

A non-psychologist who manages EAP clients from Oct 2027, about Rp6M a month (estimate).

Decide by: Jul 2027

Referral reward

Rp100k session credit to each side. Our lead psychologist checks it against the HIMPSI code.

Decide by: Nov 2026

How the pool of 20 is paid

Per session (40% of the price), with 8 open hours a month each. Trainees cannot counsel alone.

Decide by: Oct 2026

Down payment from BI

Ask for 30% before the March head-office program, or invoices in stages.

Decide by: 17 Oct 2026

Source: Our model; founders' discussion, 5 October 2026.

APPENDIX

Where do the numbers come from?

Our answer: The tables, rules and checks behind each slide, so anyone can test the plan.

Questions this part answers

- What are the numbers behind each chart?
- How are running cost, contracts and capacity set?
- How do we win clients and trainers for less?
- What are the risks?
- What do the business words mean?
- What is still an estimate?

A B2B | **B** B2C | **C** People | **D** Money

The numbers behind the charts

APPENDIX

Three estimates for 2027, then a normal full year, one change per row.

2027 estimate	Sales	Net profit	Net margin	Lowest cash	Cash end 2027	Months below floor
Conservative: BI buys 30% less, no bank deal	1,606	267	16.6%	67 (Apr 27)	328	4
Current: our plan	2,040	532	26.1%	82 (Feb 27)	524	1
Aggressive: bank deal from July, 2 days a month	2,521	845	33.5%	82 (Feb 27)	779	2
Current + guard rule	2,040	569	27.9%	89 (Feb 27)	561	0
Current + guard rule + both cash levers	2,040	569	27.9%	107 (Jan 27)	572	0
Current, but EAP 2 signed with a bank (April)	2,010	518	25.8%	71 (Apr 27)	509	2

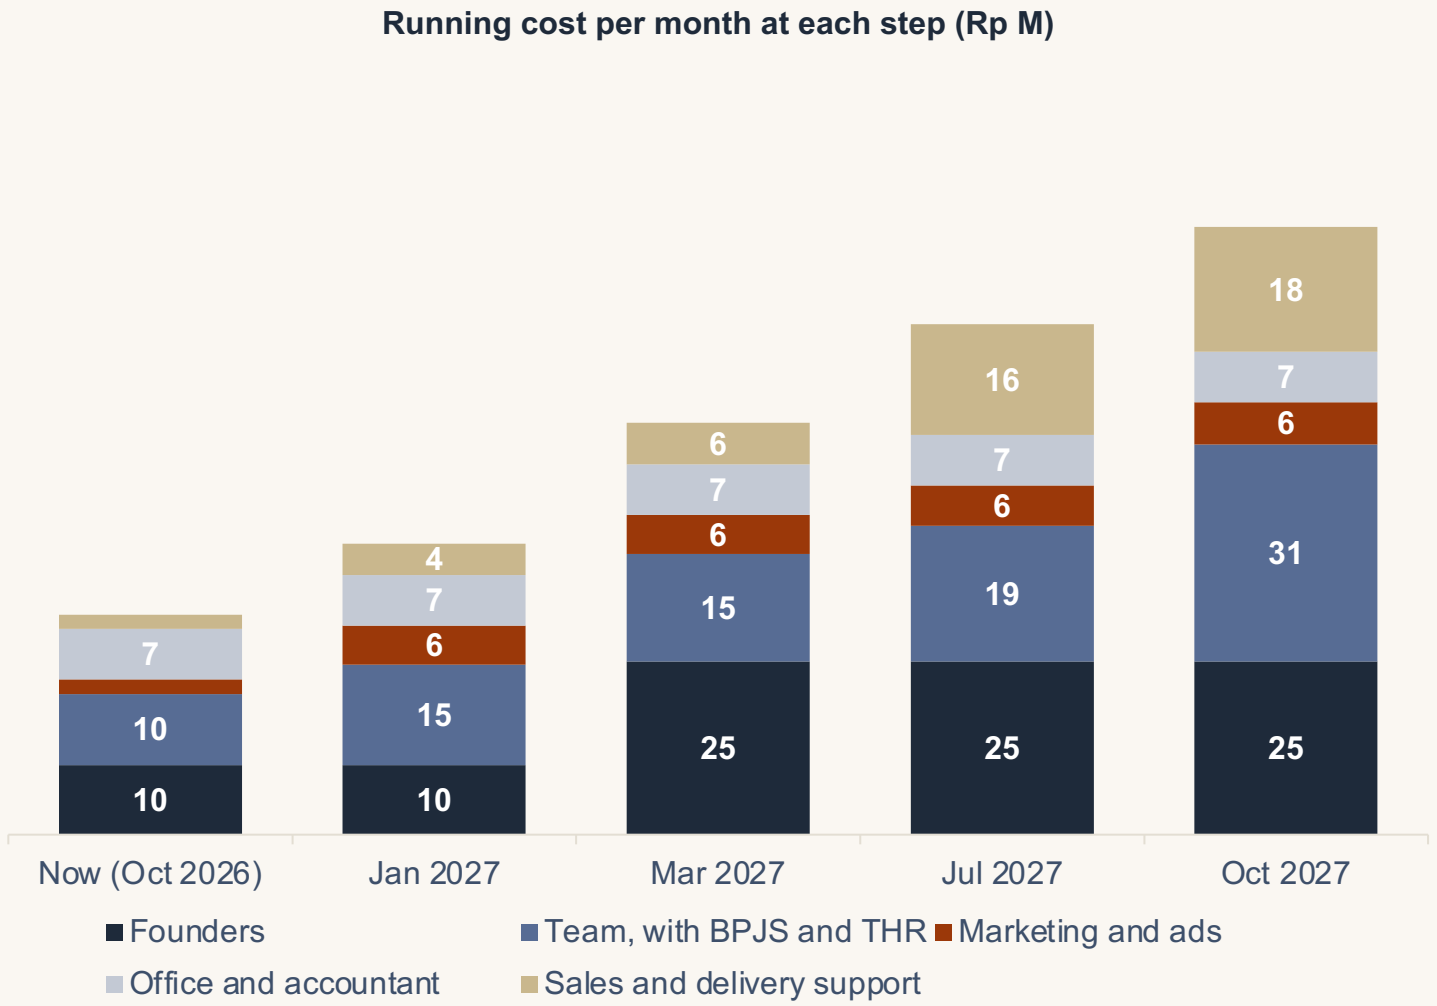

A normal full year (2027 sales plan)	Sales	Gross profit	Fixed cost	Net profit	Net margin
Old prices, today's pay	1,208			152	12.5%
New prices, today's pay	1,502	1,018	632	378	25.2%
+ fair pay, Lead Partnership, Instagram ads	1,502	1,018	911	100	6.6%
+ 2 more EAP contracts	1,862	1,258	911	338	18.1%
+ co-founder, but no new deal	1,862	1,258	1,007	242	13.0%
+ co-founder wins 10 bank training days	2,372	1,598	1,007	579	24.4%
+ Teman Journey pays the CTO	2,372	1,598	1,127	459	19.4%
+ second admin	2,372	1,598	1,208	378	15.9%
Full team, Theta pays the CTO	2,372	1,598	1,088	498	21.0%

Source: Our model; Excel recalculated every case. Tax is 0.5% of sales.

Running cost grows in steps: Rp32M to Rp88M

APPENDIX

Running cost = all fixed costs in one month. Each step starts after the work that pays for it is signed.

Jan 2027

BPJS and THR; Instagram ads Rp4.5M in total

Mar 2027

room for both founders (Rp25M); first new programs

Jul 2027

pay step 1 (since May); sales co-founder; standby project manager

Oct 2027

pay step 2: admin at minimum wage; Lead Partnership; first bank days

Source: Our model, current estimate for 2027, month by month (Pay_Plan sheet).

Two programs: win clients and trainers for less

APPENDIX

Cheaper growth, not lower pay: each lever also brings sales or trainers we need.

A Win clients for less

Cost to win one new client

- **Referral:** Rp100k session credit to each side; 20% of new clients by Q4 2027 (slide 19)
- **Channels we already own:** EAP staff come through Theta vouchers; one head office opens many branches
- **Proof of impact:** Before/after report on every training: easier re-orders, real stories for Instagram
- **Ads discipline:** Each month, pause any ad that costs more per client than the Rp0.84M profit a client brings

Rp1.5M
per client from Instagram, Jan 2027

Rp0.2M
per client from referral

B Grow and keep good trainers

Cost to find, train and keep one trainer

- **Grow our own:** Best training participants and our pool of 20 psychologists: observe → co-lead → lead
- **Keep the loyal few:** Minimum days a year, paid within days of handover, a 'Certified TJ Trainer' title
- **Certification as a product:** Clients pay for a trainer licence (Bank Elite); the best join our pool
- **Trust that sells:** Lead trainers that regulators trust help win the next deal (slide 25)

Rp2.5M
to certify one trainer we grow ourselves

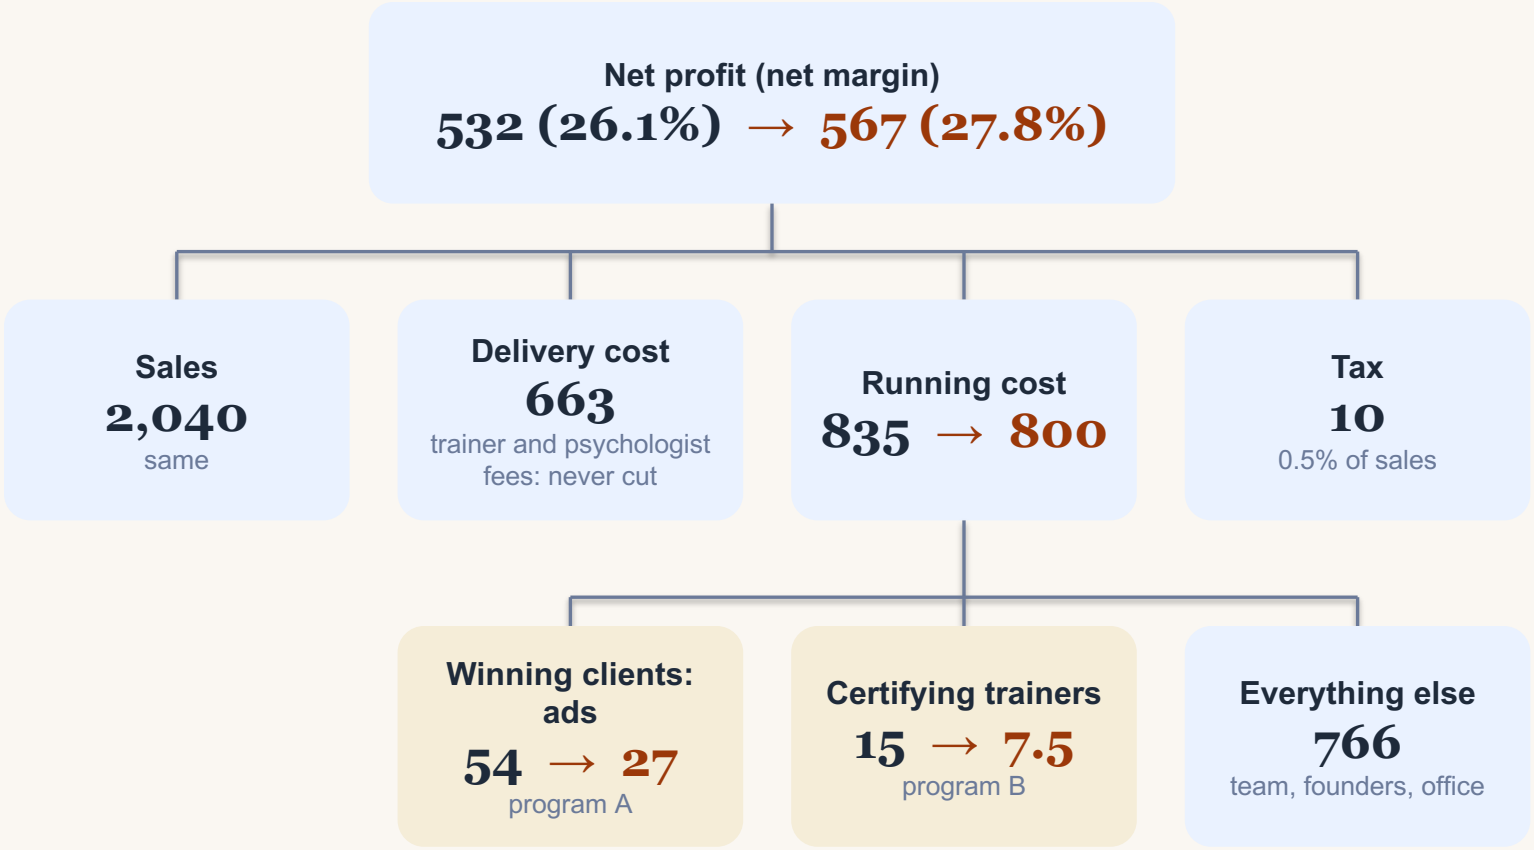

2.5x
what big-name trainers charge banks, vs our old rate

Guardrail: we never cut what we pay trainers and psychologists. That is the People pillar and our fair-pay floor (slide 4). We cut the cost of finding them, and of finding clients.

Source: Our model, current estimate for 2027, month by month (B2C sheet, Capacity_OPEX). Program effects are targets, not yet in the model.

Lower acquisition cost lifts our margin to 27.8%

Our profit tree, read like a DuPont tree: black is the 2027 plan, red is after programs A and B.

Net profit = sales − delivery cost − running cost − tax. Follow the red numbers up: Rp34.5M less running cost is Rp34.5M more profit, so net margin rises from 26.1% to 27.8%. All money in Rp M, 2027.

Rp51M

more sales would give the same Rp34.5M profit: about 2.5 more regional training days

Rp1 = Rp1.5

a rupiah saved is worth Rp1.5 of sales for us. In the factory example it is $16.

What this means for us

Most of our costs do not grow with sales, so each extra rupiah of sales keeps 67%. Saving is not much stronger than selling.

So pick levers that do both: lower what it costs to win clients and trainers, and bring more sales.

Source: Our model, current estimate for 2027, month by month. Program effects are estimates: same ad money wins twice the clients; clients pay half of trainer certification.

Better contracts in four areas

APPENDIX

We keep part-time pay levels. We change how the contracts work.

Area	Psychologists	Trainers	Project manager
1. How we pay	Full-time: market salary + bonus when an EAP client renews. Part-time: fee per session	Day rate by level; client pays travel; repays training cost if leaving before 4 events	Small monthly fee to stay available + Rp2M per project
2. What they promise	Part-time: 8+ hours a month on Theta; reply within 24 hours; 3 months notice	Yearly agreement; at most 2 events a month; confirm 30 days before	Up to 2 projects a month; we get the first call; a handover file
3. How we check quality	Client rating 4.5 of 5 or more; reports on time; review every 3 months	Participant scores; tests before and after the training	On time; invoice before BI's payment date; client rating
4. How we reduce risk	Client data kept private; senior supervision; insurance; no direct work with our clients for 12 months	We own the training material; a backup trainer for each event	A written guide; a second project manager learns one project every 3 months

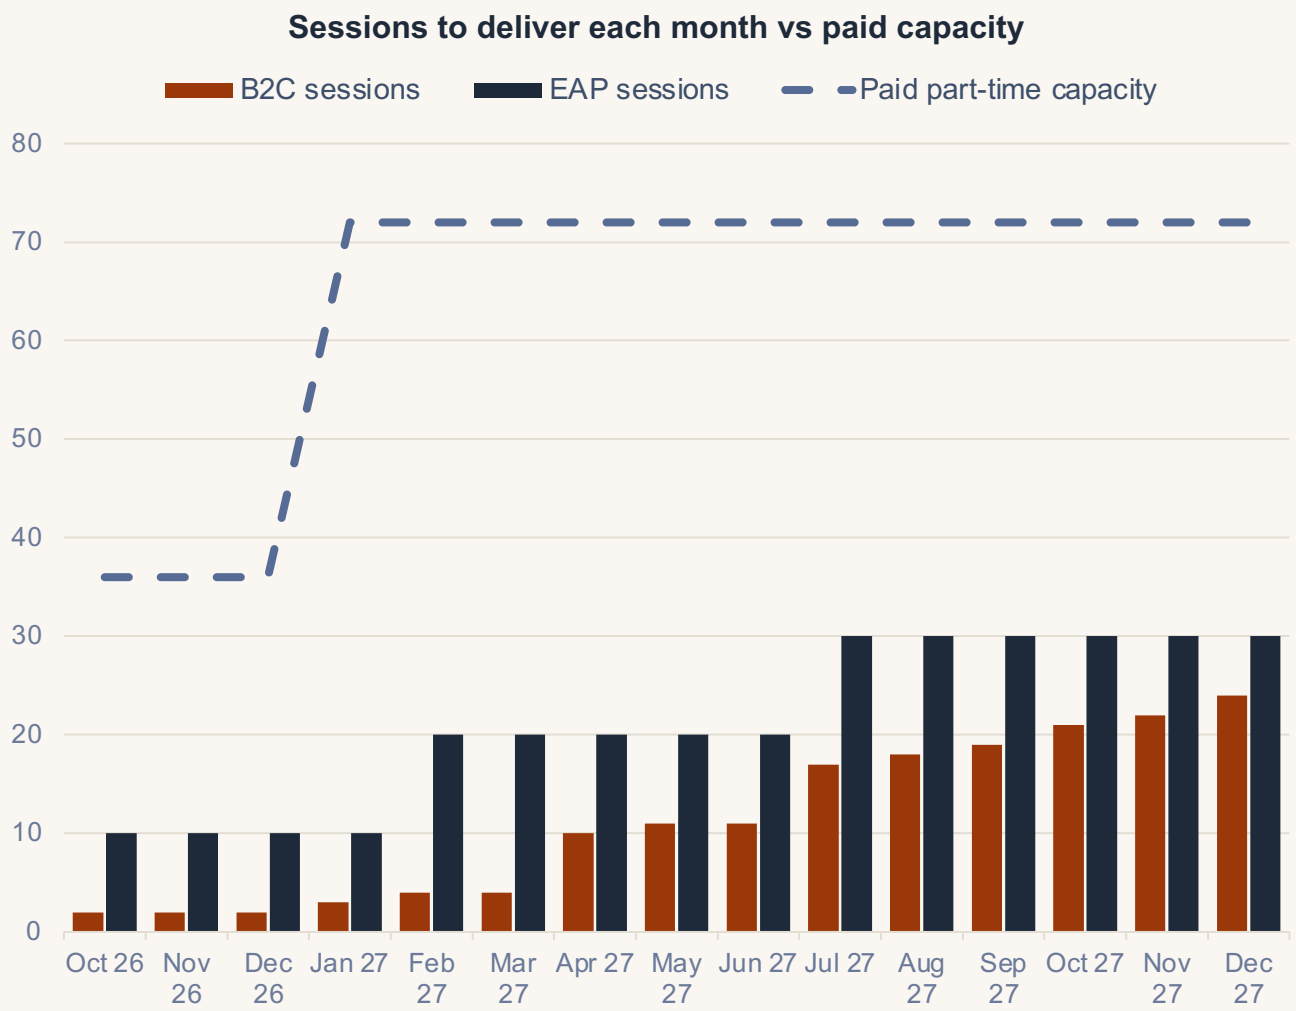

Why psychologists will join us: paid hours we promise, supervision and SKP points (professional credits), work with BI and OJK, and flexible hours on Theta.

Source: Session fees and day rates are estimates; compare them with the market before you sign.

Psychologist capacity: two part-timers and a pool

APPENDIX

Two paid part-timers cover up to 72 sessions a month. Our pool of 20 covers peaks, Sundays and special cases.

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Day (EAP)	A	A	A	B	B	-	-
Evening 18-21 (B2C)	B	A	B	A	Pool	B (day)	Pool

A = lead part-timer. B = new part-timer (Jan). Pool = 20, per session.

74%
busiest load on the 2 part-timers (healthy: 60-80%)

54
sessions a month at peak (B2C + EAP)

Rules for good availability

- Every new client gets a slot within 48 hours
- WhatsApp reply within 1 hour; booking link open 24/7 on Theta
- Each pool member opens at least 8 hours a month

Source: Our model, current estimate for 2027, month by month (B2C sheet, capacity rows). Shifts: 3 a week per part-timer, 3 sessions each. EAP: 10 sessions a month per contract.

Risks and how we respond

APPENDIX

Ways to respond: reduce the risk, share it (for example insurance), accept it, or stop the activity.

Risk	Chance	Impact	Response	Action	Who watches, and when to act
We start selling too late and miss budget windows	High	High	Reduce	Stop dates: BI proposal by 17 Oct; no EAP 2 by 15 Dec = delay the April pay step; no BI work order by 31 Jan = March slips	Kia and Galih; Roadmap sheet monthly
One project manager has too much work	High	High	Reduce	Standby project manager, Rp2M a project, booked by May (slide 24)	Kia; 3 or more projects in a month
A certified trainer leaves	Medium	High	Reduce	Yearly agreement; trainer repays training cost; train up to 8	Galih; fewer trainers than the busiest month needs + 1
A client hires our trainer directly	Medium	Medium	Reduce	No direct work with our clients for 12 months; we own the material	Co-founder; any direct approach
A clinical or ethics problem	Low	High	Share + reduce	Insurance; senior supervision; clear steps to escalate	Lead psychologist; any case
Staff data leaks (EAP, Theta)	Low	High	Reduce	Consent, access control, data agreement (data protection law)	CTO; check every 3 months
BI cuts its budget	Medium	High	Reduce	Grow EAP and banks: BI share of sales from 61% to 38%	Kia; BI below plan for 2 months

Conservative estimate: BI buys 30% less and no bank deal. Margin 16.6%, lowest cash Rp67M. If BI falls below plan, do not start the July steps.

Source: Chance and impact are our own judgement. Review this list every 3 months.

Word list

APPENDIX

The business words in this deck, in simple terms.

Word	What it means
Sales (revenue)	All the money clients pay us
Delivery cost	What one job costs us: psychologist and trainer fees, materials
Gross profit	Sales minus delivery cost. One EAP contract: 15 - 5 = Rp10M a month
Fixed cost	What we pay every month, even with no work: salaries, office, software
Net profit	Gross profit minus fixed cost and tax: what we really keep
Net margin	Net profit as a share of sales. 15% = we keep Rp15 of every Rp100
Running cost	All fixed costs in one month: pay, office, software, ads
Cash	Money in the bank today. Profit is not cash until the client pays
Cash cushion	Money we keep for bad times: 6 months of fixed cost

Word	What it means
Conservative, current, aggressive	Three estimates: a bad year, our plan, a good year
Fair pay	At least the minimum wage, plus BPJS and THR, for full-time staff
UMP, BPJS, THR	Minimum wage; state health and work insurance; holiday bonus
EAP	A company pays us monthly; we support its staff with counseling
Recurring income	Money that comes every month without a new sale, like EAP
Trigger	The event that tells us it is time to hire
Co-founder, shares	A partner who owns part of the company; shares are earned over years
Business unit	A separate part of the business, for example Theta or Coreitera
Framework, SPK	A yearly agreement with a client; a work order for one job under it

Source: Example numbers use one EAP contract: the client pays Rp15M a month and the work costs us Rp5M.

What the model includes, and what to confirm

APPENDIX

Every estimate below changes a number in this deck. Replace it with the real number when we have it.

The model now includes

Real timing: no new events before March 2027

Pay set month by month, with BPJS and THR

New EAP, co-founder and bank days

Sales, costs and cash in one chart

A roadmap: the latest start for each deal and hire

Still open

Owners: Kia and Galih for now (proposal)

Theta and CTO costs are in no model

Is our current EAP contract still active?

Will BI accept the new 2027 prices?

Does the 0.5% small-business tax still apply?

Estimate	Value we used	How to check
Second founder's pay	Rp15M a month from March (room)	Founders decide
BPJS and THR on top of pay	18% of pay	Payroll provider quote
Lead Partnership pay	Rp6M a month from Oct 2027	2 or 3 candidate talks
EAP price per employee	Rp30k a month, 500 staff	Ask 2 bank HR heads
EAP contract 2 start	February 2027	Signed by mid-January
Sales co-founder salary	Rp8M a month + shares	Talks with candidates
CTO salary	Rp10M a month	CTO's expectation
Bank deal	1 training day a month from Oct 2027	First bank proposal
Lead times to sign a client	2 weeks to 6 weeks of paperwork	Log real deals
Income tax	0.5% of sales	Tax consultant
People each trainee reaches	2 each	BI ambassador reports

Source: Review of our financial model and the projection guide, 5 October 2026.

Bonus: Magang Nasional gives us one paid intern

APPENDIX

The government pays the intern. Not in our numbers: if approved, it is a bonus.

What it is

- Kemnaker's national internship (MagangHub)
- For people who graduated in the last 12 months
- In 2026 the state pays about the minimum wage (about Rp5.7M)

What we need

- A PT with NIB or WLKP, and a company NPWP
- A SIAPkerja account and an agreement with Kemnaker
- A mentor and a real learning plan
- Max 20% of our employees: 1 person

How we use it

- 1 new psychology graduate for content and assessment admin
- Support to a paid person, never a replacement
- Not for counseling: that needs a licensed psychologist

Next step: register on MagangHub this month, then apply for the next batch. Other interns stay true learning roles with a written agreement, an allowance and BPJS work-accident cover.

Source: Kemnaker MagangHub (maganghub.kemnaker.go.id); Antara and Kompas, May 2026. Programme for 2027 not yet confirmed.
